

KBC Group

EXTENDED QUARTERLY REPORT

3Q 2009

www.kbc.com

KBC Group - Investor Relations Office - E-mail: investor.relations@kbc.com

Management certification of financial statements and quarterly report

'I, Luc Philips, Chief Financial Officer of the KBC group, certify that, to the best of my knowledge, the abbreviated financial statements included in the quarterly report are based on the relevant accounting standards and fairly present in all material respects the financial condition and results of KBC Group NV, including its consolidated subsidiaries.'

Statement of risk

As a banking, insurance and asset management group, KBC is exposed to a number of typical risks such as – but certainly not exclusively – credit default risk, movements in interest rates, capital markets risk, currency risk, liquidity risk, insurance underwriting risk, operational risk, exposure to emerging markets, changes in regulations, customer litigations as well as the economy in general. It is part of the business risk that both the macroeconomic environment and the ongoing restructuring plans may have a negative impact on asset values or generate additional charges beyond anticipated levels.

Key risk management data are provided in the annual reports, the quarterly reports and the dedicated risk reports, all available on www.kbc.com.

Earnings statement

KBC Group, 3Q 2009 and 9M 2009

This news release contains information that is subject to transparency regulations for listed companies – 13 November 2009, 7 a.m. CET

Summary

KBC ended the three months to September 2009 with a net profit of 528 million euros. Excluding exceptional items, an underlying net profit of 631 million euros was achieved, 54% higher than the previous quarter and up 15% compared to the third quarter of 2008. Jan Vanhevel, Group CEO: *'Although volume trends remain sluggish for the time being, business margins continue to be resilient and charges for problem loans are lower. The figures presented in this earnings statement provide evidence of the underlying earnings power of the group. The operating environment further gradually improved during the third quarter and leading indicators are signalling that we are past the bottom of the economic cycle.'*

Financial highlights for 3Q 2009:

- Continued resilient interest margin trend: net interest margin at 1.9%, up from 1.8% in previous quarter
- Supportive institutional trading environment, further gradual recovery of fee and commission income but lower insurance income
- On an underlying basis, operating expenses down 4% year-on-year
- Credit risk: loan provision charge significantly lower (year-to-date loan loss ratio of 79 basis points)
- -0.1 billion euros of exceptional items: various fair value changes of balance sheet positions (with negative items outweighing positive ones), partly offset by the positive impact of the repurchase of hybrid Tier-1 securities.

The income statement summary tables are on pages 5 and 6 of this earnings statement.

Financial highlights – 3Q 2009

Jan Vanhevel, Group CEO summarises the underlying business performance for 3Q 2009 as follows:

- *'On an underlying basis, interest income grew by 3% quarter-on-quarter and 17% year-on-year. While volume growth slowed in core markets and international loan exposure has been reduced, the net interest margin remained healthy. The average net interest margin for the banking operations stood at 1.86%, compared to 1.78% for the previous quarter.'*
- *'Still a mixed picture for non-interest income. Trading results were solid, even some 5% above the strong level of the previous quarter. Fee and commission income was up 2% on the previous quarter, benefiting further from the improved investment climate, though it is still, as yet, too early for a further marked rebound of asset-management-driven fee and commission income. Insurance premiums increased compared to the year-earlier quarter, but total insurance revenue suffered from lower investment yields.'*
- *'Since late 2008, major efforts have been made to reduce costs. Following a marked consecutive decrease in previous quarters, the cost trend is bottoming out. Operating costs ended 4% lower year-on-year.'*
- *'Compared to the previous quarter, loan losses were lower by 210 million euros or -37%. Loan losses were considerably lower for the international loan book in the merchant banking unit, and also in Belgium. In Central & Eastern Europe, additional loan provisions were set aside for corporate Russia and the unsecured consumer finance business in Poland, two particular areas of higher risk. In other parts of the CEE region, loan losses were roughly stable. In Ireland, they were down somewhat to 40 million euros, bringing the year-to-date loan loss ratio to 0.74%.'*

Headlines of underlying performance per business unit:

- With total income slightly up and costs and impairment charges slightly down compared to the previous quarter, a good pre-tax performance was posted again in the Belgium Business Unit. After tax, net profit remained stable at a fairly high level, bringing the year-to-date return on allocated equity to 32%.
- Compared to the preceding quarter, the net result for Central and Eastern Europe was impacted by additional loan impairment for Russia (15 million euros higher, mainly related to corporate credit) and Poland (13 million euros higher, mainly related to consumer finance). The year-to-date credit cost ratio for the entire region edged up to 1.83%. In the fourth quarter, additional loan loss provisions for Polish consumer finance are anticipated; however, total credit costs in Central & Eastern Europe and Russia for the full year are expected to remain within the 2.00%-2.30% range (cf. earlier guidance). KBC is now planning to refocus its consumer finance activities in Poland, moving away from the stand-alone specialist model and towards an integrated bancassurance distribution model.
- In merchant banking, there was a major recovery of net profit on the back of falling corporate loan provision charges (even when excluding the non-recurrence of general provisions set aside in 2Q 2009 for the US mortgage-backed securities portfolio). Results for capital market activities also remained solid.
- Results for the European Private Banking Business Unit were down slightly on the previous quarter, because some restructuring charges were posted. On the revenue side, increased securities-related income was offset by lower interbank income earned on available excess liquidity.

The quarter was also characterised by a number of one-off items that were not part of the normal course of business and were excluded from the presented underlying results. The main items were:

- A value mark-up of KBC's CDO exposure was generated in the amount of +0.2 billion euros, net, primarily resulting from the further easing of market prices for corporate credit risk;
- A positive impact of +0.1 billion, after tax, was realised when perpetual subordinated hybrid Tier-1 securities were repurchased following a public tender offering; this repurchase also had a positive effect (+0.19%) on the core Tier-1 ratio of the group.
- A fair value change of KBC's own debt issued of -0.2 billion euros, net, was recognised due to the improvement of KBC's own credit default swap spread;
- A net present value change of the CDO guarantee fee of -0.1 billion euros, net, was posted, since the downwards shift of the interest yield curve resulted in lower discount rates used for the net present value calculation;
- A trading loss of -0.1 billion euros, net, was posted related to 'legacy' structured derivatives positions within KBC Financial Products (Merchant Banking).

Financial highlights – 9M 2009

Explanations per heading of the income statement for 9M 2009 (see summary table on page 5):

- The *net result* for the first nine months of 2009 amounted to -2.8 billion euros. This figure includes exceptional items (totalling -4.3 billion euros, net), such as value losses on CDO investments, the fee paid for the guarantee bought to cover the remaining CDO-linked exposure and position losses of discontinued trading activities. Adjusted for those items, (underlying) profit came to a positive 1.5 billion euros.

- *Net interest income* came to 4.5 billion euros, up 21% year-on-year (+12% on an underlying basis). While volume growth slowed down, margins recovered significantly at the start of 2009. As at 30 September 2009, the customer loan book (excluding reverse repos) stood, on an organic basis, 4% below the year-earlier level (up 2% in Belgium, but down 1% in Central & Eastern Europe and 8% in Merchant Banking). The net interest margin for banking came to 1.81%, up from 1.68% for the first nine months of 2008.
- *Gross earned premiums* in insurance stood at 3.7 billion euros, up 16% on the year-earlier figure. Net of *technical charges* and the *ceded reinsurance result*, income came to 324 million euros. The combined ratio for the non-life insurance activities came to a favourable 94%.
- *Dividend income* from equity investments amounted to 108 million euros, markedly lower than the 195 million euros reported for the first nine months of 2008. The equity investment portfolio shrank (to 1.9 billion euros, down from 2.7 billion euros at the start of the year) while corporate dividend payouts were also generally lower.
- *Net gains from financial instruments at fair value* came to -3.8 billion euros. Although sales and trading activities on money and debt securities markets performed well, this income heading was strongly impacted by net negative value adjustments on structured credit exposure (including the cost of the acquired guarantee) and the marking down of discontinued derivative positions. On an underlying basis, this income heading came to +886 million euros.
- *Gains from available-for-sale assets* (mostly on investments in shares) were 164 million euros. Due to the pursued policy of reducing the share investment portfolio and the past poor equity market performance, this was considerably below the year-earlier figure of 341 million euros.
- *Net fee and commission income* amounted to 1.1 billion euros. This is 20% lower than the year-earlier level, largely due to the lower income from asset management activities consequent on the investment climate that prevailed until the first half of 2009.
- *Other net income* ended at 384 million euros, down somewhat on the year-earlier figure of 435 million euros
- Excluding exceptional items, *operating expenses* were down 7% year-on-year. Cost containment measures were implemented across all business units. The underlying cost/income ratio for banking stood at 55%, compared to 64% for 2008.
- Total *impairment charges* stood at 1.8 billion euros, 1.3 billion euros of which related to loans and receivables. This corresponds with a credit cost ratio of 0.96%. Excluding the charge for US mortgage-backed securities classified as loans, the credit cost ratio for the group came to 0.79% (0.12% for the Belgium Business Unit, 1.83% for the Central & Eastern Europe and Russia Business Unit and 0.76% for Merchant Banking Business Unit). *Available-for-sale* investment securities, mainly shares, were impaired to the tune of 335 million euros on the back of falling share prices throughout 2008 and up to the end of the first quarter of 2009. An impairment loss of 181 million euros was recognised on the value of goodwill outstanding, related to, among other things, acquisitions made in late 2007 and in early 2008 in Bulgaria and Slovakia.
- As pre-tax results were negative, a deferred *income tax* credit of 266 million euros was recognised.
- The result attributable to minority interests amounted to a negative 66 million euros (the negative amount has to do with the repurchase of a number of hybrid capital securities in the third quarter of 2009).
- At the end of September 2009, *total equity* came to 16.9 billion euros, up 1.6 billion euros on the figure at the start of the year, due to the fact that the negative year-to-date result (-2.8 billion) and the effect of the buying back hybrid capital securities (-0.6 billion) was offset by the positive impact of the issue of non-voting core capital securities to the State (Flemish Region of Belgium, +3.5 billion euros) and the positive market value adjustments on assets (+1.6 billion euros). The tier-1 capital ratio for the group stood at 10.2 % (8.8%, when excluding non-state hybrid tier-1 instruments).

Strategy highlights and future developments

- Jan Vanhevel, Group CEO: *'The operating environment further gradually improved during the third quarter and leading indicators are signalling that we are past the bottom of the economic cycle.'* On the other hand, fears remain that the recent economic recovery may not gain momentum since it has been driven by rebuilding inventory levels and temporary fiscal boosts without there being a structural rise in demand, among other factors. Jan Vanhevel: *'Of course, we are happy with the recent optimism and are now preparing for a further recovery. However, we are not assuming that we are back to a normal situation just yet.'* Underwriting criteria remain tight, especially in non-core markets and higher-risk areas. Although a late-cyclical rise in non-performing loan levels may appear, impairment charges are expected to remain manageable.
- Jan Vanhevel: *'KBC has been rethinking its position and partly reshaping itself in the wake of the financial crisis, lowering its risk tolerance while maintaining core earnings power and organic growth potential.'* The strategy review formed the basis of the restructuring plan that was submitted to the European Commission in relation to the capital support transactions with the State. Jan Vanhevel: *'We believe that we have entered a final stage of our discussions with the EU, and we remain confident about our business case.'* The highlights of the plan were made public at an earlier date. The business strategy will focus on organically growing bancassurance in Belgium and Central and Eastern Europe, while especially international corporate lending and capital market activities are planned to be

reduced. The redemption of the capital securities issued to the State will be based largely on retained earnings and on the release of capital tied up in non-core assets.

- The European Commission provisionally cleared KBC's restructuring plan in June 2009 and is now anticipated to give final approval by early December at the latest. As is usual for this type of communication, KBC may ask the market regulator to temporarily suspend trading in its securities on the day the plan is published in order for the market to take note of the details. An investor conference will also be scheduled shortly after publication and will be open to capital market participants that have registered in advance (details will be available on www.kbc.com). All PowerPoint presentations will be made available to the public on www.kbc.com at the start of the conference.

Additional information on the financial statements

- During the third quarter of 2009, no changes were made to the scope of consolidation or to the valuation rules that had a material net impact on earnings.
- On average for the third quarter, value of local currencies in Central and Eastern European markets appreciated by 4% against the euro, compared to the previous quarter, which had a positive impact on the earnings components of the Central & Eastern Europe and Russia Business Unit. However, when comparing the third quarter to the same period of 2008, the average value of those currencies depreciated by 10%, which had a negative impact on earnings.
- *Total equity* at 30 September 2009 (16.9 billion euros) comprises the 7-billion-euros' worth of non-voting core capital securities issued to both the Belgian Federal State and the Flemish Regional Government of Belgium. Total equity breaks down into *parent shareholder's equity* (9.4 billion euros), *non-voting core capital securities* (7.0 billion euros) and *minority interests* (0.5 billion euros).
- *Parent shareholders' equity per share* at 30 September 2009 (27.7 euros) was calculated on the basis of 339.6 million shares, whereby the number of treasury shares held (18.2 million) was deducted from the number of ordinary shares outstanding (357.8 million).
- *Earnings per share* for 3Q 2009 (1.56 euros) was calculated on the basis of 339.54 million shares (average number during the quarter), while *diluted earnings per share* (1.56 euros) was calculated on the basis of 339.55 million shares (also quarterly average). In both cases, the average number of treasury shares held was deducted from the average ordinary share count. For calculating diluted earnings per share, however, the number of stock options granted to employees with an exercise price below the market price (25 579) was also deducted. Under IAS33, the conversion option held on a portion of the non-voting core capital securities issued to the State and the share underwriting commitment by the State linked to the CDO guarantee scheme have no impact.
- As usual, KBC has made additional risk disclosures on the composition of both its loan book and its structured credit exposure as at 30 September 2009 (available in the English version of the extended quarterly report at www.kbc.com/ir).
- KBC will publish its results for 4Q 2009 on 11 February 2010. An extended version of the financial calendar, including analyst and investor meetings, is available at www.kbc.com/ir/calendar.

Overview of results according to IFRS – 3Q 2009 and 9M 2009

A summary of the income statement of KBC group, based on the *International Financial Reporting Standards* (IFRS) is given below. A full overview of the IFRS consolidated income statement and balance sheet is provided in the 'Consolidated Financial Statements' section of the quarterly report. A condensed statement of changes in shareholders' equity and several notes to the accounts are also available in the same section. In the period from 3Q 2008 to 1Q 2009, earnings were markedly impacted by value adjustments of investment portfolios. In order to provide a good insight into the underlying business trends, KBC also publishes its 'underlying' results (see the following section).

More information on the balance sheet can be found in the Consolidated Financial Statements part of the quarterly report.

Overview of the underlying results – 3Q 2009 and 9M 2009

Over and above the figures according to IFRS, KBC provides a number of 'underlying' figures aimed at providing more insight into the business trends.

The differences with the IFRS figures relate to the exclusion of exceptional or non-operating items and a different accounting treatment of certain hedging results and capital-market income. In view of their nature and materiality, it is important to adjust the results for these factors to understand the profit trend fully. A reconciliation table for net profit is provided on the next page.

In order to arrive at the underlying net profit, the following factors are eliminated:

- Fair value changes recognised under IFRS on derivatives used for asset and liability hedging purposes that do not qualify for *fair value hedge accounting for a portfolio hedge of interest rate risk* (since most of the hedged assets are not measured at fair value, fair valuing of hedges themselves is, from an economic point of view, an asymmetric treatment generating results without substance).
- Fair value changes recognised under IFRS on *liabilities at fair value through profit or loss* due to the changes in own credit spreads;
- Exceptional factors that do not regularly occur during the normal course of business (including exceptional value losses on financial assets due to the financial crisis).

A detailed reconciliation of net profit under IFRS and underlying net profit is provided in the table below.

Moreover, in order to arrive at the underlying figures, the following additional adjustments are made (without any impact on net profit):

- Interest results on derivatives used for asset and liability hedging purposes that do not qualify for *fair value hedge accounting for a portfolio hedge of interest rate risk* are presented in the *net interest income* heading in the same way as the interest paid on the underlying assets is treated (under IFRS, the interest results on these derivatives are recognised as *net (un)realised gains from financial instruments at fair value*);

- All income components related to professional trading activities within the investment banking division are presented under the *net (un)realised gains from financial instruments at fair value* heading (while under IFRS, income is split across different headings).

* Includes banking, KBL EPB and holding activities.

Net interest income in the quarter under review amounted to 1 391 million, even further up on the high levels of the two previous quarters and significantly higher (some 17%) than the year-earlier quarter. This year-on-year increase is thanks mainly to the continued recovery of the net interest margin since the start of the year (1.86% in the current quarter compared to 1.57% in the year-earlier quarter). The margin improvement is largely due to a combination of healthier credit and deposit spreads (a year ago, interest rates for traditional savings products in Belgium stood at historically high levels, and have been decreasing continuously since, in line with consecutive cuts in the ECB base rate), combined with a shift towards deposit products with a higher margin for the group. Moreover, year-on-year, net interest income also benefitted from the (investment of) core capital securities (30 million in 3Q 2009). Compared to a year ago, credit and deposit

volumes dropped 4% and 11%, respectively, but this was virtually entirely accounted for by the Merchant Banking Business Unit and related to the reduction in the international loan book, in line with the renewed strategic focus of the group. Compared to a quarter ago, deposit volumes have slightly decreased (-1%), while weakening demand for credit and especially the above-mentioned, ongoing reduction in some credit portfolios (in Hungary, Russia and countries outside the home markets) led to a 3% quarter-on-quarter drop in loan volumes.

Gross earned insurance premiums in the quarter under review amounted to 1 122 million.

Non-life sales continued to increase. At 495 million, they were up 2% and 3% on the previous and year-earlier quarters, respectively (excluding the effect of the changes in CEER exchange rates). Moreover, the non-life insurance activities continued to post a fine technical result, which is illustrated by a combined ratio of 94% for the first nine months of the year, a further improvement compared to the 95% registered in FY 2008. The group's solid combined ratio is attributable to the excellent technical performance of non-life insurance in Belgium (with a combined ratio of a mere 88% for that business unit) and in Merchant Banking (86% combined ratio). In CEER, however, high claims in Poland pushed up the combined ratio to 104% for 9M 2009.

The claims reserve ratio for the entire group amounted to 178%, up on the 165% recorded at the end of 2008.

Gross earned premiums in the life insurance business amounted to 627 million in the quarter under review, but this IFRS figure excludes certain types of life insurance contracts (i.e. the unit-linked contracts). When these contracts are included, life insurance sales amounted to 1 billion in the quarter under review, slightly below the previous quarter as a result of the traditional slowdown in clients' investments during the summer, but up 23% on the low level recorded in the year-earlier quarter. As was the case in the past few quarters, interest-guaranteed products accounted for the largest share of life sales (766 million). Sales of unit-linked products amounted to 234 million, which, though still not back at pre-crisis levels, constitutes a second consecutive quarter-on-quarter increase. At 30 September 2009, the group's total life reserves stood at 24 billion, up 4% on the previous quarter and up 5% on the year-earlier quarter.

At 9 million, dividend income was significantly down on the 47 million recorded in the previous quarter, since the bulk of dividends are traditionally received in the second quarter of the year. It was also down on the 20 million recognised in the year-earlier quarter, due to the decrease in the share portfolio and generally lower corporate dividend payouts.

Net (un)realised gains from financial instruments at fair value (trading and fair value income) amounted to 335 million, comparable to the high level of the previous quarter, and 93 million up on the year-earlier quarter. The significant year-on-year increase is due to a number of factors, including the good performance of the debt and money market activities, especially at the Brussels' dealing room.

It should be noted that the underlying figures exclude fair value changes in ALM hedging instruments (small positive amount in the quarter under review), the CDO-related impact (positive amount), changes in fair value of the group's own debt instruments (negative amount) and costs related to specialised investment banking activities that are being built-down (negative amount). A full overview of the impact of these non-operational items, including figures for all reference quarters, is provided in the table 'Underlying profit analysis, KBC Group' in the first part of this report, while the impact for each business unit is summarised separately in the following sections of this report.

Realised gains on available-for-sale assets stood at 95 million in the quarter under review, more than double the average of the last four quarters.

Net fee and commission income stood at 400 million in the quarter under review. Although this is still a decrease of 7% compared to a year ago, it is up 2% on the previous quarter (notwithstanding the traditional summer drop) and hence a continuation of the recovery from the record low in the first quarter of 2009 (since then, commission income has grown by 22%). The quarter-on-quarter improvement was predominantly due to the 3% quarter-on-quarter rise in commissions *received* in the banking business (mainly asset management-related fees), which was partly compensated by an increase of fees *paid* in the insurance business. After a number of quarterly decreases, total assets under management at group level (206 billion as at 30 September 2009) were on the rise again (+3% on the previous quarter), thanks entirely to the increase in asset prices.

Other net income amounted to 93 million, down on the 109-million average of the last four quarters.

Analysis of operating expenses (underlying figures)

| Operating expenses (in millions of EUR) UNDERLYING FIGURES | 1Q 2008 | 2Q 2008 | 3Q 2008 | 4Q 2008 | 1Q 2009 | 2Q 2009 | 3Q 2009 |

| Operating expenses | -1 284 | -1 383 | -1 278 | -1 646 | -1 235 | -1 196 | -1 224 |
| Belgium | - 464 | - 486 | - 479 | - 601 | - 464 | -448 | -444 |
| Central & Eastern Europe and Russia | - 406 | - 446 | - 479 | - 548 | - 399 | -381 | -396 |
| Merchant Banking | - 301 | - 323 | - 217 | - 350 | - 262 | -226 | -248 |
| European Private Banking | - 95 | - 132 | - 111 | - 148 | - 115 | -124 | -134 |
| Group Centre | - 18 | 4 | 8 | 0 | 4 | -17 | -1 |

At 1 224 million, operating expenses in 3Q 2009 were down 4% on the year-earlier quarter, and up 2% on the previous quarter. However, the quarter-on-quarter increase is fully explained by FX effects (on average, CEER currencies appreciated some 4% compared to the previous quarter) and a one-off reclassification (some employee benefit taxes were included in the tax line in the previous quarter, but have since been moved to operating expenses); excluding these items, costs were down 1% quarter-on-quarter. Eliminating CEER FX effects and the fact that 3Q 2008 included a significant reversal of provisions for staff bonuses, costs were down 6% year-on-year, thanks to lower variable remuneration, the lower number of FTEs (-8% year-on-year) and the reduction in investment banking activities.

Cost trends varied among the various business units. Costs increased in both the Merchant Banking Business Unit (+15%, year-on-year) and in European Private Banking Business Unit (+21%), though in both cases one-off elements (the most important ones were mentioned earlier) account for the larger part of the increase. The cost increase in these business units was more than compensated by the significant costs decreases in both the Belgium Business Unit (-7%) and the CEER Business Unit (-17%, largely surpassing the 10% year-on-year average exchange rate depreciation of CEER currencies against the euro).

As a result, the banking business' cost/income ratio (expenses versus total income) for the first nine months of the year stood at a comfortable 55% for the whole group, a significant improvement on the 64% recorded for FY 2008 (as already stated, the direct impact of the financial crisis on income has been disregarded in these calculations). The 9M 2009 cost-income ratio for the banking business breaks down per business unit as follows: 57% for Belgium, 58% for CEER, 39% for Merchant Banking and 71% for European Private Banking.

The non-life insurance cost ratio (net expenses/net written premiums) stood at 31% for 9M 2009 (compared to 34% for FY 2008) and is broken down as follows: 30% for Belgium, 35% for CEER and 18% for Merchant Banking.

Analysis of impairment (underlying figures)

| Impairment (in millions of EUR) UNDERLYING FIGURES | 1Q 2008 | 2Q 2008 | 3Q 2008 | 4Q 2008 | 1Q 2009 | 2Q 2009 | 3Q 2009 |
|---|------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Impairment on loans and advances | -27 | -143 | -130 | -341 | -307 | -567 | -356 |
| Impairment on available-for-sale assets | 0 | 0 | -15 | -29 | -3 | -1 | 0 |
| Impairment on goodwill | 0 | 0 | 0 | -15 | 0 | 0 | 0 |
| Impairment on other | 0 | -9 | 2 | -36 | -9 | 8 | -11 |
| Impairment | -28 | -152 | -143 | -420 | -319 | -560 | -367 |
| Belgium | -4 | -13 | -18 | -12 | -19 | -20 | -11 |
| Central & Eastern Europe and Russia | -35 | -53 | -83 | -151 | -187 | -171 | -214 |
| Merchant Banking | 13 | -85 | -42 | -215 | -112 | -368 | -141 |
| European Private Banking | -2 | 0 | 0 | -41 | -1 | -1 | -1 |
| Group Centre | 0 | 0 | 0 | -2 | 0 | 0 | 0 |

In 3Q 2009, impairment on loans and advances (loan loss provisions) stood at 356 million, clearly much higher than the 130 million recognised in the year-earlier quarter. However, compared to the previous quarter, loan losses were 210 million lower, which is almost entirely accounted for by the Merchant Banking Business Unit and is explained by lower loan losses on the international loan book and the fact that the previous quarter had been heavily impacted by general loan loss provisions for US mortgage-backed securities. In the CEER Business Unit, loan losses went up (+25 million on the previous quarter, mainly in Russia and Poland), while in the Belgium Business Unit, they remained extremely low (even down 9 million on the previous quarter).

There were virtually no impairments on *available-for-sale assets* in 3Q 2009, in line with figure recorded in the previous quarter. It should be noted that, although share prices went up in the quarter under review, this does not lead to reversals of impairments with a positive effect on P/L (increasing share prices are only reflected in the revaluation reserve for shares – part of shareholders' equity – which went from 125 million at the end of June 2009 to 333 million at the end of September 2009).

The annualised credit cost ratio (which includes both loans and corporate and bank bonds) for 9M 2009 stood at 96 basis points for the whole group (79 basis points excluding mortgage-backed securities), slightly down on the 101 basis points recorded for 6M 2009, and up compared to the 70 basis points registered in FY 2008. The 9M 2009 credit cost ratio breaks down as follows: a very low 12 basis points for the Belgium Business Unit (9 basis points in FY 2008), 183 basis points for the CEER Business Unit (83 basis points in FY 2008) and 116 basis points for the Merchant Banking Business Unit (90 basis points in FY 2008). At the end of September 2009, some 3.3% of the loan book was non-performing, compared to 2.8% three months ago. The group repeats that, although economic conditions are gradually improving, the usual time lag between movements in the economic cycle and non-performing loans may cause a further increase in the non-performing ratio in the quarters ahead.

Note that the underlying figures exclude the 58 million impairments made on the *goodwill* that had been booked on a number of (mostly Central European) subsidiaries in the quarter under review. Other impairments (11 million in the quarter under review) relate mainly to the downward valuation of a building in the Czech Republic.

Analysis of other earnings components (underlying figures)

| Other components of the result (in millions of EUR) | 1Q 2008 | 2Q 2008 | 3Q 2008 | 4Q 2008 | 1Q 2009 | 2Q 2009 | 3Q 2009 |
|---|---------|---------|---------|---------|---------|---------|---------|
| UNDERLYING FIGURES | | | | | | | |
| Share in result of associated companies | 16 | 8 | 9 | -20 | 0 | -2 | 3 |
| Income tax expense | -200 | -188 | -175 | 94 | -181 | -162 | -167 |
| Minority interests in profit after tax | 26 | 28 | 32 | 24 | 21 | 24 | 18 |

The share in the results of associated companies, which concerns mainly the minority participation in Nova Ljubljanska banka in Slovenia, stood at a positive 3 million in the quarter under review, compared to a negative 2 million in the previous quarter, and a positive 9 million a year earlier.

Group tax amounted to 167 million in 3Q 2009.

The result attributable to minority shareholders in group companies came to 18 million, down somewhat on the 25 million average of the last four quarters. This underlying figure excludes the effect of some hybrid securities being repurchased in 3Q 2009; in the IFRS figures, the discount on the repurchase of these hybrid capital securities (presented as minority interests in the balance sheet) was deducted, and added to profit after tax attributable to the equity holders of the parent.

Underlying results per business unit

The group consists of five business units: Belgium, Central & Eastern Europe and Russia (CEER), Merchant Banking, European Private Banking, and Shared Services & Operations. This last encompasses IT, payments processing and centralised 'product factories', such as asset management, consumer finance, leasing and trade finance. All revenue and expenses of the Shared Services & Operations Business Unit are allocated to the other business units.

The following sections of this report provide an underlying income statement and associated comments for each business unit.

Belgium Business Unit (underlying trend)

In the quarter under review, the Belgium Business Unit generated an underlying profit of 289 million, on a par with the previous quarter and up 35% on the 215 million in the year-earlier quarter.

These underlying figures exclude exceptional items. A table reconciling underlying net profit and net profit according to IFRS is provided further on in this section.

The Belgium Business Unit encompasses the retail bancassurance activities in Belgium (including the KBC brand private banking activities). More specifically, it includes the retail and private banking activities of the legal entity KBC Bank in Belgium, the activities of the legal entity KBC Insurance, as well as the activities of a number of Belgian subsidiaries (primarily CBC Banque, Centea, Fidea and ADD).

For a definition of ratios, see 'glossary and other information'.

Net interest income for this business unit amounted to 607 million in the quarter under review. This constitutes not only a significant improvement on the low levels recorded in the second half of 2008 (455 million on average), but even a further improvement on the increased levels recorded since the beginning of the year (586 million on average). The improvement since the start of the year was mainly attributable to a return to healthier margins on loans and deposits (cf. the gradual lowering of the deposit remuneration following the high levels in the summer of 2008), combined with a shift towards higher-margin deposit products (shift from time deposits to saving accounts). Net interest income was also positively impacted by the reinvestment of the core capital securities (some 18 million in 3Q 2009). As a result, the net interest margin for this business unit rose significantly, up from 1.19% a year ago to 1.54% in 3Q 2009.

Loan volumes were down slightly (-1%) in the quarter under review, while deposits increased some 2%. Compared to a year ago, loan volumes grew 2%, while deposit volumes decreased 1%.

Gross earned premiums for the group's insurance activities in Belgium amounted to 774 million. This breaks down into 535 million for life insurance and 240 million for non-life insurance. The latter was slightly up compared to the previous quarter and increased a healthy 5% year-on-year. In combination with lower claims, this led to a fine technical result for

the Belgian non-life insurance activities, as illustrated, for instance, by a very favourable combined ratio of 88% for 9M 2009, a significant improvement on the 96% registered in FY 2008.

As regards life insurance, gross earned premiums under IFRS exclude certain forms of life insurance contracts (i.e. the unit-linked contracts). When these products are included, total life insurance sales amounted to 654 million. This constitutes a decrease of 17% compared to the previous quarter, which is partially related to the traditional summer slowdown in customers' investment activities, which led to a drop in the sale of interest-guaranteed products. Sales of unit-linked products, on the other hand, rose by 17% quarter-on-quarter, though sales of these products are still not back to pre-crisis levels. Compared to the depressed level of life insurance sales a year ago, this quarter's sales went up by almost 50%, thanks entirely to the increased sales of interest-guaranteed products.

As at the end of September 2009, the total life reserves of this business unit stood at 21 billion, up 4% quarter-on-quarter and 9% year-on-year.

Dividend income was virtually at zero in the quarter under review, down on the 30 million registered in the previous quarter, since the bulk of corporate dividends are received in that quarter. Net (un)realised gains on financial instruments at fair value stood at 29 million for the quarter under review, up on the 15 million average of the last four quarters, due to positive fair value adjustments of some embedded derivative products. As already explained, the underlying results exclude the CDO-related impact; overview provided in the table below). Net realised gains on available-for-sale assets amounted to 41 million in the quarter under review, in line with the average of the last four quarters.

At 152 million, net fee and commission income was more or less in line with the 156 million registered in the previous quarter, and hence confirms the recovery from the very low level recorded in the first quarter of the year (121 million). This was mainly thanks to the increase in mutual fund-related fee income, following the gradual improvement of the investment climate. The latter is also reflected in the assets under management of the business unit, which increased by 2% to 147 billion in the quarter under review, after a number of consecutive decreases in the previous quarters. Compared to a year ago, both net fee and commission income and assets under management were still down some 7%.

Other net income came to 52 million, somewhat above the 42-million-euro average of the last four quarters.

Operating expenses in 3Q 2009 came to 444 million, an improvement of 1% and 7%, respectively, on the 2Q 2009 and 3Q 2008 levels, reflecting the impact of the ongoing cost containment measures, including the reduction in FTEs (-2% year-on-year) and lower variable remuneration. As a result, the cost-income ratio for the Belgian banking activities in the first nine months of the year amounted to a comfortable 57%, a significant improvement compared to the 71% recognised for FY 2008.

Credit costs for the Belgian retail portfolio remained at a very comfortable level: in the quarter under review, they amounted to a mere 11 million, even down on the already very low 20 and 18 million recorded in the previous and year-earlier quarters. For the first nine months of 2009, this is reflected in a very favourable credit cost ratio of 12 basis points, compared to 9 basis points for FY 2008. As at 30 September 2009, around 1.8% of this business unit's loan book was non-performing, unchanged from three months ago and only marginally up on the beginning of the year (1.7%). Notwithstanding improving economic conditions, a late-cyclical increase in non-performing loans cannot be excluded in the quarters to come.

CEER Business Unit (underlying trend)

In the quarter under review, the CEER Business Unit generated an underlying profit of 42 million, down on the 71 million recorded in the previous quarter and clearly down on the 201 million recorded a year earlier, mainly on the back of higher loan loss charges. 3Q 2009 net profit breaks down as follows: 109 million in the Czech Republic, 5 million in Slovakia, 21 million in Hungary, -1 million in Poland, -31 million in Russia and -61 million as other results.

The underlying profit figure excludes exceptional items. A table reconciling this underlying net profit and the net result according to IFRS is provided further on in this section.

The CEER Business Unit encompasses all banking and insurance activities in Central and Eastern Europe and Russia, primarily:

- Czech Republic: ČSOB Bank (CR) and ČSOB Insurance (CR)
- Slovakia: ČSOB Bank (including Istrobanka), ČSOB Insurance (SR)
- Hungary: K&H Bank and K&H Insurance
- Poland: Kredyt Bank and WARTA Insurance
- Bulgaria: CIBank and DZI Insurance
- Russia: Absolut Bank
- Serbia: KBC Banka
- Slovenia: NLB Bank (minority participation) and NLB Life.

For a definition of ratios, see 'glossary and other information'.

The change in the average exchange rate against the euro of the main currencies in the region compared to both 3Q 2008 and 2Q 2009 is provided in the table below. Compared to a year ago, the weighted average change in the exchange rate for the business unit was -10% (depreciation against the euro). Compared to a quarter ago, the weighted average change was a +4% (appreciation against the euro). In order not to distort the comparison, the 'organic' growth figures mentioned below exclude the impact of changes in exchange rates. No significant new acquisitions were made in the quarter under review nor compared to a year ago.

| CEER exchange rates changes | CZK | SKK | HUF | PLN | RUB |
|----------------------------------|-------------|------------|-----------|----------|----------|
| +: appreciation against the euro | | | | | |
| -: depreciation against the euro | (Czech Rep) | (Slovakia) | (Hungary) | (Poland) | (Russia) |
| 3Q 2009 / 3Q 2008 | -5% | 1% | -13% | -21% | -18% |
| 3Q 2009 / 2Q 2009 | 5% | * | 7% | 7% | -2% |

* Slovakia switched to the euro on 1 January 2009.

Net interest income amounted to 461 million in the quarter under review, which, on an organic basis, is 2% lower than the previous quarter. This is related to the fact that, for the region as a whole, deposit and loan volumes dropped by 2% and 1%, respectively, in the quarter under review. The decrease in the loan portfolio of the business unit in the quarter under review was most pronounced for the Russian loan book (-11%), and, to a lesser extent, the Hungarian and Polish loan books (both -2%), while loan portfolios remained virtually unchanged in the other countries.

Compared to a year ago, loan volumes also dropped 1% (largely attributable to Russia and Hungary), while deposit volumes increased by 4% on an organic basis. The loan-to-deposit ratio for the region as a whole stood at 86% at 30 September 2009.

The average net interest margin of the CEER Business Unit stood at 3.15% in 3Q 2009, compared to 3.08% in 2Q 2009 and 3.18% in 3Q 2008.

Gross earned insurance premiums amounted to 283 million. On an organic basis, non-life premiums (201 million) remained virtually the same as in both reference quarters. However, mainly due to high claims in Poland, the CEER's non-life year-to-date technical performance deteriorated, as illustrated by a high 9M 2009 combined ratio of 104%, compared to 95% in FY 2008. While the combined ratio in Poland – due to the high level of claims – rose to a high 113% in 9M 2009, the ratio remained below 100% in all the other countries (92% for the Czech Republic, 96% for Slovakia, 84% for Hungary and 99% for Bulgaria).

Life premiums, including unit-linked products (which are not included in the IFRS figures) amounted to 276 million in the quarter under review. This is a 4% organic increase compared to a year ago and a 20% increase compared to the previous quarter, the latter growth was due largely to increased sales of interest-guaranteed products in Poland in the quarter under review. At 30 September 2009, the outstanding life reserves in this business unit amounted to 1.6 billion.

Dividend income dropped to 1 million in the quarter under review, after the traditional increase in the second quarter, while net (un)realised gains from financial instruments at fair value stood at 14 million, down on the average figure of 61 million for the last four quarters. As already explained, these underlying figures do not include CDO-related items (see overview in the table below). Net realised gains from available-for-sale assets stood at 4 million, slightly up on the average of 2 million for the last four quarters.

Net fee and commission income amounted to 82 million in the quarter under review. On an organic basis, this is flat compared to the previous quarter, as the increase in fees received in the banking business was fully offset by the higher level of paid fees in the insurance activities. Compared to a year ago, net fee and commission income increased some 10% on an organic basis. Here, the decrease in fees received in banking was offset by an even bigger decrease in fees paid in insurance, resulting in a net increase in fee income. The assets under management of this business unit came to 12 billion on 30 September 2009, up 4% on the quarter-earlier situation (on an organic basis), thanks largely to increased asset prices.

Lastly, other net income came to 25 million in the quarter under review, down on the 37-million-euro average of the last four quarters.

The operating expenses of this business unit stood at 396 million, which, on an organic basis, constitutes a decrease of 2% quarter-on-quarter and as much as 6% year-on-year. The year-on-year decline in costs is due to a number of elements, including a decrease in FTEs (-8%), lower variable remuneration, and various cost cutting exercises. As a consequence, the 9M 2009 cost/income ratio for the CEER banking activities improved to 58%, from 60% for FY 2008.

At 203 million, impairments on loans and receivables went up some 20 million (on an organic basis) compared to the previous quarter, due chiefly to higher loan losses in Russia and in Polish consumer finance. This is reflected in a credit cost ratio of 183 basis points for 9M 2009, slightly up on the 6M 2009 ratio (175 basis points), but still below the guiding figure of 200-230 basis points for FY 2009. The 9M 2009 credit cost ratio breaks down as follows: 106 basis points for the Czech Republic, 138 basis points for Slovakia, 190 basis points for Poland, 175 basis points for Hungary and 548 basis points for Russia. The non-performing loan ratio for the business unit as a whole stood at 4.3%, a further increase on the figure of three months ago (3.1%), part of which is caused by methodological fine-tuning though. As loan losses follow the economic downturn, a further increase in loan losses and non-performing loans in the quarters to come cannot be excluded.

Impairment on goodwill related to recent acquisitions of CEER companies (56 million in 3Q 2009) is treated as an exceptional item and hence does not show up in the underlying figures. Impairment on other assets amounted to -11 million in the quarter under review, and related *inter alia* to a downward value adjustment of a building in the Czech Republic.

Merchant Banking Business Unit (underlying trend)

In the quarter under review, the Merchant Banking Business Unit generated an underlying profit of 281 million, significantly up on the 41 million recorded in the previous quarter, following lower loan losses, and also up on the 137 million posted a year earlier. The 3Q 2009 underlying result breaks down as follows:

- 98 million for commercial banking activities
- 183 million for investment banking activities

The underlying figures exclude exceptional items. A table reconciling this underlying net profit and the net result according to IFRS is provided further on in this section.

The Merchant Banking Business Unit encompasses the financial services provided to SMEs and corporate customers (including in Belgium) and capital market activities. However, all merchant banking activities of the CEER group companies are handled by the CEER Business Unit.

More specifically, the business unit includes the merchant banking activities of KBC Bank in Belgium and its branches elsewhere, as well as the activities of the following subsidiaries (only the main ones are mentioned): KBC Lease, KBC Securities, KBC Financial Products, Antwerp Diamond Bank, KBC Private Equity, KBC Bank Deutschland, KBC Clearing, KBC Peel Hunt, KBC Commercial Finance, KBC Finance Ireland, KBC Bank Ireland, Secura and Assurisk.

For a definition of ratios, see 'glossary and other information'.

Net interest income for this business unit, which relates to the commercial banking activities, amounted to 271 million in 3Q 2009, up on the 257-million-euro average of the last four quarters. While the loan book of this business unit continued to shrink (-7% compared to the previous quarter, -4% compared to a year ago, reflecting the intended reduction in a number of international loan books), the net interest income continued to be supported by the benign margin environment and the reinvestment of the new capital securities issued (a positive impact of 13 million in 3Q 2009).

Gross earned premiums amounted to 72 million in the quarter under review, an increase compared to the 64 and 69 million recorded in the previous and year-earlier quarters. At just below 86%, the combined ratio for this business unit's reinsurance operations continued to be very favourable and even further improved on the 87% registered in FY 2008.

At 8 million in 3Q 2009, dividend income was up both on the 3 million recorded in the year-earlier quarter and the 6 million booked in the previous quarter.

Net (un)realised gains from financial instruments at fair value relate to currency and securities sales and trading and other fair value income. In the quarter under review, this trading and fair value income amounted to 274 million, down somewhat on the strong 2Q 2009, but significantly up on 3Q 2008 (117 million). The year-on-year increase is related to various elements, including the strong performance of the debt capital and money market activities – viz. the Brussels' dealing room – and higher income from the convertible bond business.

As already explained, the underlying figures do not include CDO-related items and losses related to structured derivatives businesses that are being wound down (i.e. various business lines of KBC Financial Products). An overview of these non-operational items is provided in the table below.

Net realised gains from available-for-sale assets amounted to a positive 29 million in 3Q 2009, compared to a negative 2-million-euro average for the last four quarters. Net fee and commission income amounted to 75 million in the quarter under review. Though still 7% beneath last year's figure, commission income was up for the second consecutive quarter, thanks *inter alia* to higher income from corporate finance activities, and is now already 50% above the record low of 1Q 2009. Other net income came to 39 million, more or less in line with the previous quarter, but down on the year-earlier quarter, which included a significant gain on the sale of a building.

In the quarter under review, operating expenses amounted to 248 million. In commercial banking, costs remained flat quarter-on-quarter and have gone down 9% compared to a year ago, mainly due to a decrease in FTEs and lower variable staff remuneration. In investment banking, the apparent cost increase (21% quarter-on-quarter and 52% year-on-year) was entirely due to a reclassification in 3Q 2009 (certain employee benefit tax expenses that were booked in the tax line in the previous quarter were moved to the cost line in the current quarter) and the fact that 3Q 2008 included the positive impact of some 74 million reversal of bonus accruals. Excluding these items, costs in investment banking went down 2% quarter-on-quarter and as much as 19% year-on-year, as a result of lower FTEs (-18% year-on-year) related to the continued run-down of certain activities at KBC Financial Products, in line with the new strategic focus of the group.

Impairment on loans and receivables stood at 142 million in 3Q 2009. While still up compared to a year ago – reflecting the year-on-year economic deterioration – this constitutes a significant drop compared to the 368 million loan losses recorded in the previous quarter. This quarter-on-quarter decrease was mainly due to a 36-million-decrease in loan losses on commercial loans and the fact that the previous quarter contained a significant amount (some 138 million) of general provisions relating to US mortgage-backed securities. As a consequence, the annualised 9M 2009 credit cost ratio for this business unit dropped to 116 basis points (of which 76 basis points on pure loans, i.e. excluding mortgage-backed securities), compared to 131 basis points for 6M 2009. Specifically for Ireland, the 9M 2009 credit cost ratio amounted to 74 basis points, while, non-performing loans accounted for 6.3% of the Irish loan book at 30 September 2009. The non-performing ratio for the whole business unit was 3.7% at the end of September 2009, up from 3.3% recorded a quarter ago. Although economic conditions are improving, a late-cyclical increase in loan losses and non-performing loans for this business unit cannot be excluded in the quarters ahead.

Other impairments (on available-for-sale assets and on goodwill) were immaterial in 3Q 2009.

European Private Banking Business Unit (underlying trend)

In the quarter under review, the European Private Banking Business Unit generated an underlying profit of 38 million, down on the 44 million recorded in the previous quarter, following some restructuring charges, but up on the 32 million recognised a year ago.

The underlying profit figure excludes exceptional items. A table reconciling this underlying net profit and the net result according to IFRS is provided further on in this section.

The European Private Banking Business Unit comprises the activities of the KBL European Private Bankers group. More specifically, it includes KBL European Private Bankers and its subsidiaries in the Benelux and other European countries (Germany, France, Monaco, the UK, Poland and Switzerland), as well as the insurance company VITIS Life in Luxembourg.

For a definition of ratios, see 'glossary and other information'.

Net interest income in the quarter under review stood at 56 million. As anticipated, this is somewhat lower than the record levels of the last few quarters (on average 64 million), as the high remuneration levels on the interbank market have been falling since then.

The life premium technical result (gross earned premiums less gross technical charges) amounted to a negative 3 million in 3Q 2009, fully in line with the average of the last four quarters.

At 0.3 million, dividend income was more or less in line with the year-earlier figure, but fell compared to the 4-million seasonal high of the previous quarter, since most dividends are received in the second quarter of the year.

As was the case in the previous quarter, net (un)realised gains from financial instruments at fair value amounted to 18 million in 3Q 2009, in line with the 21 million recorded in 2Q 2009, but significantly up on the negative 17 million recorded in 3Q 2008. As mentioned before, valuation losses on structured credit (significant amounts in 2008, insignificant in 2009) are excluded from these underlying figures (an overview follows in the table below).

Net realised gains from available-for-sale investments stood at 21 million, a significant increase compared to the 5-million-euro average of the last four quarters. As was the case in the previous quarter, these capital gains related predominantly to the sale of bonds.

Following a number of relatively weak quarters, net fee and commission income (at 92 million) was on the rise again in the current quarter. The 4% recovery on the previous quarter was attributable to better than expected on-shore activities during the summer, combined with a 5% increase in assets under management (see further). Compared to a year ago, net fee and commission income was still clearly down some 7%, as the weaker – though improving – investment climate was reflected in a year-on-year decrease in AUM and a shift in clients' investments towards products with a lower profitability for the group.

As at 30 September 2009, the assets under management of this business unit amounted to 47 billion, up 5% on the previous quarter, thanks entirely to rising asset prices. Compared to a year ago, assets under management were still down some 7%, the result of both net outflows and decreased asset prices.

Other net income stood at a negative 2 million in the quarter under review, down on the positive 3-million-euro average of the last four quarters.

Operating expenses stood at 134 million in 3Q 2009, which constitutes an increase of 8% and 21%, respectively, compared to the previous and year-earlier quarters. However, around two-thirds of the quarter-on-quarter increase is related to restructuring costs, while the year-on-year comparison is additionally distorted by a 12 million recovery of provisions for litigations in 3Q 2008. Excluding these items, the cost increase is limited to 3% both quarter-on-quarter and year-on-year. This has resulted in a cost/income ratio of 71% for the first nine months of the year, a slight improvement on the 73% recorded for FY 2008.

Impairments in this quarter were insignificant, as was the case in both reference quarters. As mentioned above, the underlying figures exclude the direct impact of the financial crisis, such as impairment on shares in portfolio, as these do not reflect the normal course of business (again, it concerns significant amounts in 2008, but limited amounts in 2009; an overview follows in the table below).

Group Centre (underlying trend)

In the quarter under review, the underlying net result of the Group Centre amounted to a negative 19 million, compared to a negative 35 million in the previous quarter (which was impacted by some 20 million in consultancy fees related to the asset protection programme signed with the Belgian State).

A table reconciling this underlying result and the net result according to IFRS is provided further on.

The Group Centre comprises the results of the holding company KBC Group NV, a limited portion of the results of its subsidiaries KBC Bank NV and KBC Insurance NV (such as strategy-related expenses or non-allocated taxes), the results of the shared-service company Fin-Force and the elimination of the results of intersegment transactions.

For changes in the presentation of the balance sheet: see note 1a.

In 2006, KBC Bank N.V. sold a 5.5% stake in its Polish subsidiary Kredyt Bank to Sofina N.V. – a European financial holding company based in Brussels – in order to comply with the request of the Polish banking supervisor to restore the free float of Kredyt Bank to 20%.

By virtue of Sofina exercising its right under the shareholders' agreement entered into with KBC Bank in 3Q 2009, KBC Securities, which already owned a 2.32% stake in Kredyt Bank, has bought a portion of these shares from the Sofina group and thus increased its shareholding to 4.32%. KBL European Private Bankers S.A. has bought the remaining shares being sold by the Sofina group, giving it a 2.89% stake in Kredyt Bank.

KBC Securities and KBL European Private Bankers S.A. will hold the new shares with a view to selling them to interested investors and hence these shares are classified as non-current assets held for sale (IFRS 5) for an amount of 54 million euros.

During the 3rd quarter of 2009, KBC Bank launched a cash tender offer to repurchase certain outstanding hybrid Tier 1-securities at 70% of their face value. The result of this tender offer – which was formally closed on 13 October 2009 – was largely accounted for in the third quarter.

This operation to buy back these hybrid loans has the following accounting and solvency impact:

- Balance sheet:

- Reduction of minority interests with 0.6 billion euro concerning the EUR and USD hybrid securities issued by KBC Bank Funding Trust II, III and IV.
- Reduction of financial liabilities designated at fair value through profit or loss (considered as non-convertible subordinated liabilities) with 0.5 billion euro concerning the GBP hybrid securities issued by KBC Bank.
- KBC has used its available liquid assets to pay for this transaction.
- Increase of parent shareholders' equity due to the inclusion of an after-tax gain on the repurchase of approximately 0.12 billion euros.
- Income statement:
 - The after tax-gain on the repurchase of the hybrid securities issued by KBC Bank Funding Trust is deducted from the profit after tax attributable to minority interests for 0.12 billion euros. Consequently, this after tax-gain is added to the profit after tax attributable to the equity holders of the parent.
 - There is no additional profit impact on the repurchase of the GBP hybrid securities since these instruments were already booked at fair value through profit or loss.
- Solvency:
 - The impact on the core Tier-1 ratio for the banking activities and KBC Group consolidated is approximately +0.19%.
 - Besides the positive impact of the after-tax gain attributable to the equityholders of the parent on the repurchase of about 0.12 billion euros, this increase of the basic own funds ratio is also caused by the reduction of the prudential filter in tier 1-capital with 0.14 billion euros concerning the valuation differences of financial liabilities designated at fair value regarding own credit risk (GBP hybrid securities).

Notes on the accounting policies

Provided below is a selection of notes to the accounts. The numbers and titles of the notes that only appear in the annual report, but not in the quarterly reports, are shown below solely to ensure there is a link with the annual report.

Note 1a: Statement of compliance

The consolidated financial statements of the KBC Group have been prepared in accordance with the International Financial Reporting Standards (in particular IAS 34), as adopted for use in the European Union ('endorsed IFRS'). The consolidated financial statements of KBC present one year of comparative information.

The following IFRS standards became effective as of 1 January 2009 and have impacted the KBC interim reporting:

- IFRS 8 (Operating Segments). This standard replaces IAS 14 (Segment Reporting) and impacts the segment reporting in Note 2. In the past, the primary segments identified by KBC were based on the nature of the activities and included the banking activities, the insurance activities, European Private Banking and the Holding company. These primary segments are now replaced by the business units as applied by management: Belgium Business Unit, CEER Business Unit, Merchant Banking Business Unit, European Private Banking Business Unit and Group Centre.
- Amendments to IAS 1: the revised version of IAS 1 changes a number of requirements regarding the presentation of financial statements and requires additional disclosure. The non-owner changes to equity have been removed from the statement of changes in equity and have been included in a separate statement of comprehensive income, which is included after the income statement.

For transparency reason, the following change has been made in the presentation of the balance sheet as of 3Q 2009 (adjustment has been made retroactively to the reference figures for 2008): whereas in previous year, 'non-voting core capital securities' were included in 'parent shareholders' equity', it is as of 3Q 2009 disclosed as a separate component of total equity. Consequently, the presentation of the consolidated changes in equity and note 35 is also adjusted accordingly.

Note 1b: Summary of significant accounting policies

A summary of the main accounting policies is provided in the annual report. In 9M 2009, no changes in content were made in the accounting policies that had a material impact on the results.

Notes on segment reporting

Note 2a: Reporting according to the management structure of the group

KBC is structured and managed according to four different segments (called 'business units'):

- Belgium (retail bancassurance, asset management, private banking)
- Central & Eastern Europe and Russia (retail bancassurance, asset management, private banking, corporate banking)
- Merchant Banking (commercial banking in Belgium and selected countries in Europe, America and Southeast Asia, investment banking activities)
- European Private Banking (onshore private banking in Benelux and neighbouring countries, offshore private banking primarily in Luxembourg).

The basic principle of the segment reporting is that an individual subsidiary is allocated fully to one segment (see note 40). Exceptions are made for costs that can not be allocated reliably to a certain segment (grouped together in a separate Group Centre) and KBC Bank NV (allocated to the different segments and to the Group Centre by means of different allocation keys).

Funding costs of goodwill regarding participations recorded in KBC Bank and KBC Insurance are allocated to the different segments in function of the subsidiaries concerned. The funding costs regarding leveraging at the level of KBC Group are not allocated.

The Group Centre consists out of KBC Group NV, Fin-Force, KBC Global Services and some allocated costs. The allocation of results of KBC Bank Belgium and KBC Insurance to the Group Centre are limited to those results that can not be allocated in a reliable way to other segments.

The transactions conducted between the different segments occur at arm's length.

The figures of the segment reporting have been prepared in accordance with the general KBC accounting policies (see Note 1) and are thus in compliance with the International Financial Reporting Standards as adopted for use in the European Union (endorsed IFRS). Some exceptions to these accounting policies have been made to better reflect the underlying performance:

- In order to arrive at the underlying group profit, exceptional factors that do not regularly occur during the normal course of business are eliminated. These factors also include exceptional losses due to the financial crisis, such as those incurred on structured credit investments, on exposures to troubled banks (Lehman Brothers, Washington Mutual, Icelandic banks), on equity investments and on trading positions that were unwound due to the discontinuation of activities of KBC Financial Products. In view of their exceptional nature and materiality, it is important to separate out these factors to understand the profit trend fully (impact on net profit: see table below).
- In the IFRS accounts, a large part of KBC's derivatives used for Asset and Liability Management (ALM) are treated as 'trading instruments'. These include those derivatives that do not qualify for fair value hedge accounting for a portfolio hedge of interest rate risk. Consequently, interest results on such hedges are recognised as 'net (un)realised gains from financial instruments at fair value', while the interest paid on the underlying assets is recognised as 'net interest income'. In the underlying accounts, the interest on these derivatives is also recognised in the 'net interest income' heading (where interest results on the underlying assets are already presented), without any impact on net profit.

Moreover, fair value changes (due to marking-to-market) of these ALM derivatives are recognised under 'net (un)realised gains from financial instruments at fair value', while most of the underlying assets are not fair-valued (i.e. not marked-to-market). Hence, the 'underlying figures' exclude fair value changes in these ALM derivatives (impact on net profit: see table below).

- In the IFRS accounts, income related to trading activities is split across different components. While trading gains are recognised under 'net (un)realised gains from financial instruments at fair value', the funding costs and commissions paid in order to realise these trading gains are recognised respectively under 'net interest income' and 'net fee and commission income'. Moreover, part of the 'dividend income', 'net realised gains on available-for-sale assets' and 'other net income' are also related to trading income. In the underlying figures, all trading income components within the investment banking division are recognised under 'net (un)realised gains from financial instruments at fair value', without any impact on net profit.
- Lastly, the effect of changes in own credit spreads was taken into account to determine the fair value of liabilities at fair value through profit or loss. This resulted in value changes that had a positive impact on reported net profit. Since this is a non-operating item, the impact is excluded from the 'underlying figures' (impact on net profit: see table below).

Note 2b: Reporting according to geographic segment

The geographical information is based on geographic areas, and reflects KBC's focus on its two home markets – Belgium (land of domicile) and Central and Eastern Europe (including Russia) – and its selective presence in other countries ('rest of the world', i.e. mainly the US, Southeast Asia and Western Europe excluding Belgium). The geographic segmentation is based on the location where the services are rendered. Since at least 95% of the customers are local customers, the location of the branch or subsidiary determines the geographic breakdown of both the balance sheet and income statement. The geographic segmentation differs significantly from the business unit breakdown, due to, inter alia, a different allocation methodology and the fact that the geographic segment 'Belgium' includes not only the Belgium business unit, but also the Belgian part of the Merchant Banking Business unit.

More detailed geographic segmentation figures for balance sheet items are provided in the various Notes to the balance sheet. The breakdown here is made based on the geographic location of the counterparty.

| In millions of EUR | Belgium | Central and Eastern Europe and Russia | Rest of the world | KBC Group |

Notes on the income statement

All data in this chapter are based on IFRS. From an analytical point of view (for instance, due to the treatment of recognition of certain income components related to capital market activities and the treatment of certain ALM hedging derivatives), it may be useful to look at additional 'underlying' figures. These 'underlying' data (which are included in the Notes on segment reporting) are also provided in the 'earnings release' and 'analysis of earnings components' chapters of the extended quarterly report.

Note 5: Net (un)realised gains from financial instruments at fair value

On 30 June 2009, the European Commission temporarily approved the guarantee KBC Group NV from the Belgian federal government on May 14, 2009 and the capital strengthening performed by KBC by issuing core capital securities to the Flemish Regional government in January, 2009. The European Commission has opened a procedure during which it will further assess the valuation of the CDO-portfolio for which KBC Group bought a guarantee from the Belgian State and the remuneration paid by KBC Group for this guarantee. The financial impact of this deal, which has been included in the second quarter results, largely affects net (unrealised) gains from financial instruments at fair value.

In the third quarter 2009, the market price for corporate credit, reflected in credit default swap spreads, improved further after a markedly improvement in the second quarter 2009, generating a value mark-up of KBC's CDO exposure. The positive earnings impact from CDO revaluation amounted to 0.3 billion euros for 3Q 2009 and -2.2 billion euros for 9M 2009 (also including the impact from the acquired guarantee but excluding the related fee; the coverage of the CDO-linked counterparty risk against MBIA, the US monoline insurer, remained at the level of 30 June 2009, namely 70%).

Note 6: Net realized gains from available-for-sale assets

In October 2008, the IASB issued amendments to IAS 39 (Financial instruments: recognition and measurement) and IFRS 7 (Financial instruments: disclosure) under 'Reclassification of financial assets'. These amendments were endorsed by the European Union on 15 October 2008.

The amendments to IAS 39 in October 2008 permit an entity to reclassify certain financial assets in particular circumstances. Certain non-derivative financial assets measured *at fair value through profit or loss* (other than those classified under the fair value option) may in certain cases be reclassified to: 'held-to-maturity assets', 'loans and receivables' or 'available-for-sale assets'. Certain assets classified as 'available for sale' may be transferred to 'loans and receivables', likewise in particular cases. The amendments to IFRS 7 impose additional disclosure requirements if the reclassification option is used.

Following the implementation of these amendments, the KBC group reclassified on 31 December 2008 a number of assets out of the 'available for sale' category to the 'loans and receivables' category because they had become less liquid. On the date of reclassification, the assets in question met the definition of loans and receivables, and the group has the intention and ability to hold these assets for the foreseeable future or until maturity. Both the carrying value and the fair value of the reclassified assets came to 3.6 billion euro on 31 December 2008.

Financial assets reclassified out of 'available for sale' to 'loans and receivables' on 31-12-2008,
in millions of EUR, 30-09-2009

| | |
|----------------|-------|
| Carrying value | 3 248 |
| Fair value | 3 253 |

Financial assets reclassified out of 'available for sale' to 'loans and receivables' on 31-12-2008,
in millions of EUR, 30-09-2009, amounts before tax

| | In case of non-reclassification (AFS) | After reclassification (L&R) | Impact |
|-------------------------------------|---------------------------------------|------------------------------|--------|
| Outstanding revaluation reserve AFS | -837 | -879 | -42 |
| Impact on the income statement | -237 | -232 | 5 |

The reclassification resulted pre-tax in a negative effect on equity to the tune of -42 million euro and a positive effect on the income statement amounting to 5 million euro. Besides specific impairments, 5 million euro was also set aside for portfolio-based impairment (IBNR) on loans and receivables.

| Investment contracts with DPF | 0 | 0 |
| Life insurance provision | 0 | 0 |
| Provision for claims outstanding | 0 | 0 |
| Provision for bonuses and rebates | 0 | 0 |

Technical provisions relate to insurance contracts and investment contracts with a discretionary participation feature (DPF). Liabilities under investment contracts without DPF have to be valued according to IAS39 (deposit accounting); these liabilities concern mainly the unit-linked contracts. Liabilities under investment contracts without DPF are included in the overview on financial liabilities in note 18.

Note 32: Provisions

In 3Q 2009, a number of settlements regarding CDO's sold to private banking clients and companies were reached (among which with Deminor) for which the cost was recorded mainly in 2Q 2009.

Note 33: Other liabilities

Note 34: Retirement benefit obligations

Notes available in the annual report only.

Note 35: Parent shareholders' equity and Non-voting core-capital securities

| Other information | | |
| Par value per ordinary share (in euros) | 3.48 | 3.48 |
| Number of shares issued but not fully paid up | 0 | 0 |

The ordinary shares of KBC Group NV have no nominal value and are quoted on NYSE Euronext (Brussels) and on the Luxembourg Stock Exchange.

The number of KBC-shares held by group companies is shown in the table under 'treasury shares'. As at 30 September 2009, this number includes, *inter alia*:

- the shares that are held to meet requirements under the various employee stock option plans (892 925 shares).
- the shares that were bought in relation to the 2007-2009 3-billion-euro share buyback programme (13 360 577 shares).

Other notes

Note 36: Commitments and contingent liabilities

Note 37: Leasing

Notes available in the annual report only.

Note 38: Related party transactions

During the first nine months of 2009, there was no significant change in related parties compared to the end 2008, except for the Flemish Regional Government which subscribed to non-voting core capital securities for an amount of 3.5 billion euro. The related party transactions towards the Belgian government on the asset side have increased versus 31 December 2008 in view of higher investments in bonds.

KBC bought a guarantee from the Belgian government covering potential downside risk on the value of its collateralised debt obligations (CDO's). The results of nine months include the accounting of a fee of 1.2 billion euro (included in net gains from financial instruments at fair value).

More information on related party transactions is available in the 2008 annual report, p. 136.

Note 39: Auditor's fee

Note available in the annual report only.

During the first 9 months of 2009, changes to the scope of consolidation had no material net impact on the income statement nor on the balance sheet.

Note 42: Post-balance sheet events

Significant events between the balance sheet date (30 September 2009) and the publication of this report (13 November 2009):

- The European Commission temporary cleared KBC's restructuring plan in June 2009 and is now anticipated to give final approval by early December at the latest. The outcome could lead to significant changes for the KBC Group going forward. As usual for this type of communications, KBC may ask the market regulator to temporary suspend the trading of its securities on the day of publication of the plan in order for the market to take note of the details. An investor conference will also be scheduled shortly after publication and will be open for capital market participants upon registration in advance (details will be available on www.kbc.com). All PowerPoint presentations will be made publicly available on www.kbc.com at the start of the conference.

Note 43: General information (IAS 1)

Note available in the annual report only.

Auditor's report

Report of the statutory auditor to the shareholders of KBC Group nv on the review of the interim condensed consolidated financial statements as of 30 September 2009 and for the nine months then ended

Introduction

We have reviewed the accompanying interim condensed consolidated balance sheet of KBC Group nv (the "Company") as at 30 September 2009 and the related interim condensed consolidated income statement, statement of comprehensive income, statement of changes in equity and cash flow statement for the nine-month period then ended, and explanatory notes. Management is responsible for the preparation and presentation of these interim condensed consolidated financial statements in accordance with International Financial Reporting Standard *IAS 34 Interim Financial Reporting* ("IAS 34") as adopted for use in the European Union. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

Scope of Review

We conducted our review ("revue limitée/beperkt nazicht" as defined by the "Institut des Reviseurs d'Entreprises/Instituut der Bedrijfsrevisoren") in accordance with the recommendation of the "Institut des Reviseurs d'Entreprises/Instituut der Bedrijfsrevisoren" applicable to review engagements. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the auditing standards of the "Institut des Reviseurs d'Entreprises/Instituut der Bedrijfsrevisoren" and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34 as adopted for use in the European Union.

Without modifying the conclusion in the preceding paragraph, we draw attention to note 5 of the interim condensed consolidated financial statements mentioning the temporary approval by the European Commission of the issue of core capital securities to the Flemish Regional Government and the protection bought from the Belgian Federal Government. We wish to draw the attention to the fact that the terms based on which the transaction is recorded in the interim condensed consolidated financial statements are still subject to the final approval of the European Commission.

Glossary and other information

KBC Group, 3Q 2009 and 9M 2009

Glossary of ratios used

| | |
|-------------------------------------|---|
| CAD ratio (banking) | $\frac{[\text{consolidated regulatory capital}]}{[\text{total risk-weighted volume}]}$. Detailed calculations in the 'Solvency' section of this part. |
| Claims reserve ratio | $\frac{[\text{average net provision for claims outstanding (excl.life part)}]}{[\text{net earned premiums}]}$ |
| Combined ratio (non-life insurance) | $\frac{[\text{net claims incurred}]}{[\text{net earned premiums}]} + \frac{[\text{net expenses}]}{[\text{net written premiums}]}$ |
| Core Tier-1 capital ratio | $\frac{[\text{consolidated tier-1 capital excluding hybrid instruments}]}{[\text{total weighted volume}]}$ |
| Cost/income ratio (banking) | $\frac{[(\text{underlying}) \text{ operating expenses of the banking businesses of the group (i.e. KBC Bank and KBL EPB)}]}{[(\text{underlying}) \text{ total income of the banking businesses of the group}]}$. |
| Cover ratio | $\frac{[\text{individual impairment on non-performing loans}]}{[\text{outstanding non-performing loans}]}$. For a definition of 'non-performing', see 'Non-performing ratio'. The cover ratio may also include the individual impairment on still performing loans and portfolio-based impairments. |
| Credit cost ratio | $\frac{[\text{net changes in individual and portfolio-based impairment for credit risks}]}{[\text{average outstanding loan portfolio}]}$ |
| Earnings per share, basic | $\frac{[\text{profit after tax, attributable to the equity holders of the parent}]}{[\text{average number of ordinary shares, plus mandatorily convertible bonds, less treasury shares}]}$. |
| Earnings per share, diluted | $\frac{[\text{profit after tax, attributable to the equity holders of the parent, adjusted for interest expense (after tax) for non-mandatorily convertible bonds}]}{[\text{average number of ordinary shares, plus mandatorily convertible bonds, less treasury shares, plus the potentially dilutive effect of share options and ordinary convertible bonds}]}$. |
| Gearing ratio | $\frac{[\text{sum of the consolidated parent shareholders' equity of KBC Bank, KBC Insurance, KBL EPB and KBC Global Services}]}{[\text{consolidated parent shareholders' equity of KBC Group plus the non-voting core capital securities}]}$ |

| | |
|---|---|
| Non-performing ratio | [amount outstanding of non-performing loans (loans for which principal repayments or interest payments are more than ninety days in arrears)] / [total outstanding loan portfolio] |
| Parent shareholders' equity per share | [parent shareholders' equity] / [number of ordinary shares and mandatorily convertible bonds, less treasury shares (at period-end)] |
| Return on allocated capital (ROAC - for a particular business unit) | [profit after tax, including minority interests, of a business unit, corrected for income on allocated instead of real equity] / [average allocated equity to the business unit] Profit of a business unit is the sum of the profit of the companies belonging to the business unit, corrected for the funding cost of goodwill (related to the companies in the business unit) and allocated central governance expenses. The allocated equity to a business unit is based on a tier-1 ratio of 8.5% of risk-weighted assets for banking activities and a solvency ratio of 200% for the insurance activities. In the banking business, allocated tier-1 capital consists of core equity (75%) and hybrid instruments (25%), while in the insurance business, allocated capital consists purely of core equity. To calculate ROAC, only core equity is taken into account in the denominator. The risk-weighted assets of the banking activities are calculated according to Basel II. |
| Return on equity | [profit after tax, attributable to the equity holders of the parent] / [average parent shareholders' equity, excluding the revaluation reserve for available-for-sale investments] |
| Solvency ratio (insurance) | [consolidated available capital of KBC Insurance] / [minimum required capital of KBC Insurance]. Detailed calculations in the 'Solvency' section of this part. |
| Tier-1 ratio (banking) | [consolidated tier-1 capital] / [total risk-weighted volume]. Detailed calculations in the 'Solvency' section of this part. |

Credit ratings

KBC Group and some of its main operating subsidiaries are rated by the international rating agencies Fitch, Standard and Poor's and Moody's. The long-term and short-term ratings for KBC Bank, KBC Insurance and KBC Group are mentioned in the table.

There have not been any changes in the ratings since 30 June 2009:

| Ratings, 13-11-2009 | Long-term rating (+ outlook/watch) | | Short-term rating |

Solvency

Total Group (KBC Group)

The table shows the tier-1 and CAD ratios calculated under Basel II and Solvency I. Primarily for the Basel II, IRB Foundation approach is being used (for about 3/4th of the weighted risks), while the weighted risks of the other companies (roughly 1/4th of such risks) are calculated according to the standardized method. The total weighted risks volume of insurance companies is calculated as the required solvency margin under Solvency I divided by 8%.

Risk management information

Extensive risk management data for 31-12-2008 were provided in KBC's 2008 Annual Report. A summary update of this information is provided below. For an explanation regarding the methodology used, please refer to the annual report. Data regarding the structured credit exposure follows in the next section.

Credit risk data

The main source of credit risk is the loan portfolio of the bank. A snapshot of this portfolio is shown in the table below. It includes all payment credit, guarantee credit (except for confirmations of letters of credit and similar export-/import-related commercial credit), standby credit and credit derivatives, granted by KBC Bank and KBL EPB to private persons, companies, governments and banks. Bonds held in the investment portfolio are included if they are corporate- or bank-issued, hence government bonds and trading book exposure are not included. Ratios are defined in the 'glossary and other information' section of the quarterly report.

Definition of ratios: see 'Glossary and other information'.

¹Broken down as follows for 30-09-2009:

CZ: 1.064 %, SK: 1.384% , Hungary: 1.752 %, Poland: 1.900%, Russia: 5.476%

As at 30 September 2009, a total of 2.5 billion euros of credit exposure relates to leveraged finance financing (LBO/MBO transactions, see footnote under the table for a definition); the average transaction size is 15 million euros. The maximum engagement of KBC in leveraged financing is limited to maximum 3% of the portfolio of the Merchant Banking Business Unit and to 500 million euros for the CEER business unit.

| Additional information on leveraged finance* (KBC Bank and KBL EPB) | 31-12-2008 | 30-09-2009 |
|--|------------|------------|
| Total granted amount of leveraged finance deals (in billions of EUR) | 2.8 | 2.5 |
| Granted leveraged finance portfolio, by sector | | |

| Granted leveraged finance portfolio, by transaction size (total amount in a size interval / total leveraged finance portfolio) | | |
| Up to and incl. 10 million euros | 7.5% | 13.8% |
| Over 10 million and up to and incl. 25 million euros | 65.5% | 65.3% |
| Over 25 million and up to and incl. 50 million euros | 18.2% | 15.9% |
| Over 50 million and up to and incl. 100 million euros | 8.8% | 5.0% |
| Over 100 million euros | 0.0% | 0.0% |
| Total | 100.0% | 100.0% |

* In order to be included in this scope, following criteria must be met:

1. Involvement of a private equity fund and/or management buyout.
2. Consolidated total net debt / EBITDA \geq 4.5 or consolidated net senior debt / EBITDA \geq 2.5.

Asset/Liability management data

The first table shows - for the banking business - the extent to which the value of the portfolio would change (basis-point-value or BPV) if interest rates were to fall by ten basis points across the entire curve (positive figures indicate an increase in the value of the portfolio). The figures relate to KBC Bank, CBC Banque, Centea, KBC Lease, KBC Bank Deutschland, KBC Bank Ireland, Antwerp Diamond Bank, ČSOB CZ, CSOB SK, K&H Bank, Kredyt Bank, KBL EPB, Absolut Bank and KBC Credit Investments. The second table provides - for the insurance business - an overview of the composition of the investment portfolio. In the consolidated financial statements of KBC Group, the insurer's investment portfolio is not shown as such, but is spread over various balance sheet items.

Structured credit exposure

Summary overview

In the past, KBC acted as *originator* of structured credit transactions and moreover also *invested* in such structured credit products itself.

- KBC (via its subsidiary KBC Financial Products) acted as an *originator* when structuring CDO-deals (based on third-party assets) for itself or for third party investors. For several transactions, protection was bought from credit insurers, mainly MBIA, a US monoline insurer ('hedged CDO-linked exposure' in the table)
- KBC itself *invested* in structured credit products, both in CDOs (notes and super senior tranches), largely those originated by KBC itself ('unhedged CDO-exposure' in the table), and in other ABS ('other ABS' in the table). The main objective at that time was to differentiate risk and enhance the yield for the re-investment of its insurance reserves and bank deposits it carried in surplus of its loans.

Further details are provided in the next paragraphs.

| Structured credit exposure (CDOs and other ABS), 30-09-2009 (in billions of EUR, pre-tax) | Hedged CDO- linked exposure (insured by credit insurers) | Unhedged CDO- exposure | other ABS |
|--|---|---------------------------|-----------|
| Total nominal amount | 16.4 | 9.5 | 5.5 |
| Initial write-downs on equity and junior CDO pieces | - | -0.8 | - |
| Subsequent cumulative value adjustments | -2.2 | -4.1 | -1.7 |

Hedged CDO-exposure

As stated above, KBC bought credit protection for a large part of the (super senior) CDOs it originated.

This insurance was bought – for a relatively small part - from Lloyds TSB and Channel and – for the larger part – from MBIA, a US monoline insurer which was initially rated AAA, but whose creditworthiness declined gradually over time (leading to the booking of negative value adjustments at KBC on the credit protection received).

In February 2009, MBIA announced a restructuring, which included a spin-off of valuable assets, provoking a steep decline in its creditworthiness. Following this increased counterparty risk, significant additional negative value adjustments were booked at KBC. Moreover, the remaining risk related to MBIA's insurance coverage is to a large extent mitigated as it is included in the scope of the Asset Protection Plan that was agreed with the Belgian State on 14 May 2009 (see further).

| Hedged CDO-linked exposure (insurance for CDO-linked risks received from credit insurers), 30-09-2009 (in billions of EUR) | |
|--|------|
| Total insured amount (notional amount of super senior swaps) | 16.4 |
| - MBIA | 14.4 |
| - Lloyds TSB | 1.6 |
| - Channel | 0.4 |
| Details on MBIA insurance coverage | |
| - Total insured amount (notional amount of the super senior swap) | 14.4 |
| - Fair value of insurance coverage received (modelled replacement value, after taking into account Asset Protection Plan*) | 2.9 |
| - Credit value adjustment of counterparty risk MBIA | -2.2 |
| (in % of fair value of insurance coverage received**) | 70% |

* Remark: the MBIA-insured amount is included in the Asset Protection Plan with the Belgian State (14 May 2009) - see further

** Taking into account translation differences accrued over time.

Unhedged CDO-exposure and other ABS

This heading relates to the CDOs that KBC bought as investment and which are not 'insured' by credit protection from MBIA or other external credit insurers (the 'unhedged CDO-exposure' in the table) and other ABS in portfolio ('other ABS' in the table).

As regards the CDOs, KBC has already made significant negative value adjustments to date. Note that their remaining risk is mitigated as the unhedged super senior CDO tranches are fully included in the Asset Protection Plan concluded with the Belgian State (see further).

It has to be noted that, contrary to the situation at many peers, value adjustments on KBC's CDOs are accounted for via profit and loss (instead of directly via shareholders' equity, as is the case with many other financial institutions), since the group's CDOs are for the larger part of a synthetic nature (meaning that the underlying assets are derivative products such as credit default swaps on corporate names). The synthetic nature is also the reason why KBC's CDOs are, again contrary to many other financial institutions, *not* eligible for accounting reclassification under IFRS in order to neutralise their impact.

Until 2008, value adjustments on other ABS were largely accounted for via shareholder's equity. At the end of 2008, KBC has reduced shareholders equity's sensitivity towards value adjustments on ABS by reclassifying most of the ABS-portfolio to 'loans and receivables'. Since then, they are included in the scope of the impairment procedure that exists for the loan portfolio – see line 'cumulative impairments on other ABS' in the table below (such impairments evidently impact the P/L).

| Unhedged CDO-exposure and other ABS, 30-09-2009 (in billion of EUR) | Unhedged CDO- exposure | other ABS |
|--|---------------------------|-----------|
| Total nominal amount | 9.5 | 5.5 |
| Initial write down of junior and equity pieces | -0.8 | - |
| Total nominal amount, net of provisions for equity and junior pieces | 8.7 | 5.5 |
| - super senior tranches (included in Asset Protection Plan with Belgian State - see further) | 5.5 | - |
| - non super senior tranches (fully written down) | 3.2 | - |
| Cumulative market value adjustments | -4.1 | -1.7 |
| Of which cumulative impairments on other ABS | - | -0.3 |

Details of the underlying assets of the CDOs and ABS

In the tables below, the nominal value of the hedged CDO-exposure, the unhedged CDO-exposure (net of initial write-down of junior and equity CDO-pieces) and the ABS in portfolio is broken down according to nature and rating of the underlying assets (full look trough approach – i.e. where possible, if underlying assets consist of structured credit products themselves, the underlying assets of such products are shown in the table).

Asset Protection Plan relating to 20.0 billion EUR CDO and MBIA-related risk

On 14 May 2009, KBC Group signed an agreement with the Belgian State regarding credit protection for a large part of KBC's structured credit exposure. Simplified, the plan relates to a notional amount of 20.0 billion EUR, comprising of 5.5 billion notional value of unhedged super senior CDO-investments and 14.4 billion notional value of counterparty risk on MBIA.

Against payment of a guarantee premium KBC buys a guarantee from the State covering 90% of the default risk beyond a set first loss. Simplified, the transaction is structured as follows:

- first tranche ad 3.2 billion EUR: all effective credit loss to be borne by KBC.
- second tranche ad 2.0 billion EUR: credit loss to be borne by KBC. The Belgian State is committed to subscribe to new KBC-shares at market value, for an amount equaling 90% of the loss in this tranche (10% risk retained). KBC has the option to opt out of this equity guarantee (upon prior approval of the CBFA) or find other existing or new shareholders.
- third tranche ad 14.8 billion EUR: credit losses are for 90% compensated by the State in cash (10% loss retained by KBC).

| Asset protection plan* 20.0 billion (14.4 bln MBIA + 5.5 bln SS CDO) | Guarantee structure | Share underwriting commitment |
|---|---|---|
| FIRST TRANCHE: 3.2 bln EUR | KBC takes 100% of incurred losses up to 5.2 bln EUR | - |
| SECOND TRANCHE: 2.0 bln EUR | | Belgian State is committed to subscribe to newly issued KBC-shares, to compensate up to 90% of losses incurred in this tranche (i.e. 1.8 bln EUR), at KBC's discretion (CBFA approval required) |
| THIRD TRANCHE: 14.8 bln EUR | Belgian state compensates 90% of incurred losses (10% loss retained by KBC) | - |

* The CDO-portfolio consists of a number of CDOs. The asset protection structure is determined per CDO; the figures in the table relate to the sum of all CDOs that fall under the plan.

As a result, the potential negative impact deriving from the MBIA and CDO exposure is significantly reduced. At the time of signing of the agreement, the remaining downside impact essentially related to the retained own risk portions. Some volatility remains, however, since e.g. increasing market values imply that existing value adjustments can be reversed (with a positive impact), but if consequently market values decrease again, new value adjustments have to be booked (with a negative impact). In any case, the *cumulative* amount of booked value adjustments is always capped by the asset protection plan.

The total guarantee premium amounts to 1.2 billion EUR, and was booked in 9M 2009, and an additional commitment fee of 60 million EUR is payable semi-annually.

The fair value of the premium (net present value) is updated on a quarterly basis.

Presentation

KBC Group, 3Q 2009

3Q 2009
Financial highlights

Upward trend confirmed

Exceptional items

Reported net profit

Some exceptional items

Financial highlights 3Q 2009

- Continued resilient interest margin trend, net interest margin up to 1.9% from 1.8% in previous quarter
- Supportive institutional trading environment, further gradual recovery of fee and commission income but lower insurance income
- On underlying basis costs down -4% year on year
- Credit risk: loan provision charge significantly lower (ytd credit cost: 79bp)
- -0.1bn exceptional items: various fair value changes of balance sheet positions (with negative items outweighing positives), partly offset by the positive impact of the hybrid tier-1 buyback transaction
- Group tier 1 ratio at 10.2%, 8.8% when excluding non-State hybrid tier 1 instruments

Strategy highlights

- Further improvement of business environment, leading indicators suggest bottom of the economic cycle is behind us although not back to normal yet
- Strategy for the future will focus on organically growing bancassurance in Belgium and Central and Eastern Europe while reducing international corporate lending and capital market activities
- Reimbursement state capital will be largely based on retained earnings and release of capital tied up in non core assets
- EU temporary clearance in June, final clearance anticipated by early December at the latest

Underlying business performance

Revenue trend - Group

- Net interest income even higher than previous quarters and up 17% year on year
- Net interest margin at 1.86%
 - Improvement based on combination of healthier credit and deposit spreads (last year's historical high interest rates on savings products have decreased continuously in line with lowering of ECB rates) and shift to higher margin products
 - Year on year evolution also benefits from investment of government capital (30m in 3Q 09)
- Credit and deposit volumes down year on year (-4%, -11%) predominantly situated in Merchant Banking in line with winding down of international banking activities and quarter on quarter (-3%, -1%)

Revenue trend - Group

F&C

AUM

- Net fee and commission income up 2% compared to previous quarter (notwithstanding traditional summer drop) but still low compared to year earlier quarter (-7%)
 - Quarter on quarter improvement based on increased result in asset management fees partly compensated by higher fees paid in insurance
- Assets under management at 206bn EUR (+3% qoq), after a number of quarterly decreases on the rise again based on increasing asset prices

Revenue trend - Group

Premium income

FV gains

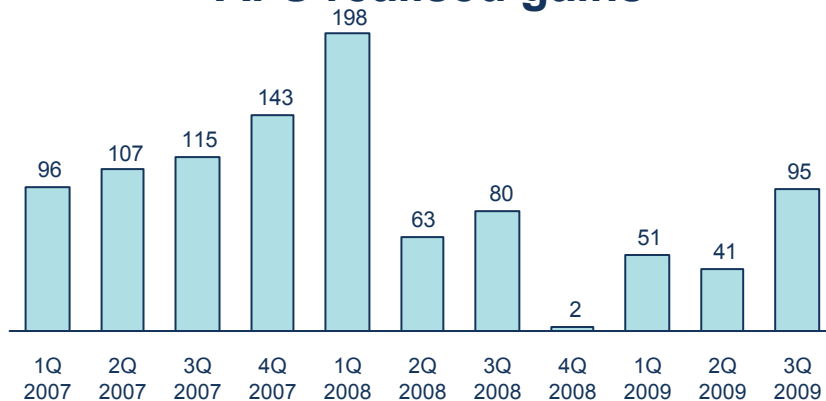

- Insurance premium income at 1.122m
 - Non-life premium income (495m) continued to increase, up 2% qoq and 3% yoy (excl. FX effects)
 - Life premium income (627m), below previous quarters as a result of lower client investments in summer months
- Solid combined ratio at 94% (compared to 95% FY2008), claims reserve ratio at 178% (compared to 165% FY2008)
- Fair value gains (335m) in line with strong previous quarter and 93m above year earlier quarter based on good performance of debt capital and money market activities, mainly in Brussels dealing room

Revenue trend - Group

AFS realised gains

Dividend income

- AFS realised gains at 95m
- Dividend income at 9m, obviously lower quarter on quarter due to dividend season in 2Q, and down compared to the year earlier quarter due to decrease of share portfolio and generally lower corporate dividends

Opex and asset impairment - Group

Operating expenses

Asset impairment

- Operating expenses at 1.224m
 - Quarter on quarter increase (+2%) fully explained by FX effects and a reclassification of employee benefit tax from taxes to operating expenses
 - Downward year on year evolution (-4%)
 - If corrected for FX effects and one off reversal of bonus provisions in 3Q 08, costs down -6% year on year
 - Since late 2008, major cost reduction efforts were made. Following a marked consecutive decrease in previous quarters, the cost trend is bottoming out.
- Lower impairments (367m)
 - Drop in impairments almost entirely located in merchant banking and due to lower loan losses in the international corporate loan book and provision on reclassified RMBS in the previous quarter

Rising credit cost within expectations

- NPL up to 3.3% from 2.8% in previous Q and 1.8% at start 09
- Credit cost in Belgium stays extremely low, even 9m below previous quarter. Unchanged NPL level, although late cycle increase is anticipated
- Increased credit cost in CEER (+25m), mainly in Russia and Poland
- Earlier given guidance for full year 2009 credit cost CEER at 200-230bps maintained

Credit cost ratio

| | Loan book | 2007 FY | 2008 FY | 1H 09 YTD | 3Q 09 YTD |
|-----------------------------------|--------------|---------|---------|----------------|------------------------------|
| Belgium | 57bn | 0.13% | 0.09% | 0.14% | 0.12% |
| CEE | 40bn | 0.26% | 0.73% | 1.75% | 1.83% |
| Merchant Incl. ABS imp. | 69bn | 0.02% | 0.48% | 0.71% 1.31% | 0.76% 1.16% |
| Total Incl ABS imp. | 170bn | 0.13% | 0.46% | 0.76% 1.01% | 0.79% 0.96% |

BU BELGIUM

BU CEER

BU MEB

■ high risk (probability of default > 6.4%)
■ restructured loans (probability of default > 6.4%)
■ non performing loans

Cost control initiatives on track

- Underlying cost income ratio down to 55%
 - 57% for Belgium, 58% for CEER, 39% for Merchant Banking and 71% for EPB
 - vs 64% for full year 2008
- Group-wide FTE reduction
 - Guidance given previously for 2009-2010 reduction around -5%
 - Realised at end 3Q 09: -7.9% (-4700 FTE)

| In '000 FTE | End 3Q 08 | End 3Q 09 | Change | |
|---------------------|-------------|-------------|-------------|--------------|
| BU Belgium | 12.6 | 12.3 | -0.3 | -2.3% |
| BE CEER | 28.6 | 26.4 | -2.2 | -7.7% |
| BU Merchant Banking | 5.1 | 4.2 | -0.9 | -18.5% |
| BE EPB | 2.8 | 2.7 | -0.1 | -5.2% |
| Shared services | 10.4 | 9.3 | -1.1 | -10.8% |
| TOTAL | 59.6 | 54.9 | -4.7 | -7.9% |

Business Unit Belgium

Underlying net profit

Volume trend

| | Total loans | Of which mortgages | Customer deposits** | AUM | Life reserves |
|--------------------|-------------|--------------------|---------------------|--------------|---------------|
| Volume | 56bn | 30bn | 75bn | 147bn | 21bn |
| Growth q/q* | -1% | +2% | +2% | +2% | +4% |
| Growth y/y | +2% | +8% | -1% | -7% | +9% |

* non-annualized

** Figures restated due to reallocation of some institutional deposits from Belgium to Merchant Banking

- Underlying profit Business Unit Belgium on par with previous quarter (289m)
- Slight decrease in credit volume quarter on quarter (-1% qoq , +2% yoy)
- Deposit volume growth quarter on quarter (+2% qoq, -1% yoy)
- Asset under management at 147bn (+2% qoq, -7% yoy)
- Growing life reserves (+4% qoq, +9% yoy)

- Net interest income at 607m surpassing the high levels since start of the year
 - Improvement versus 2H 2008 based on margin recovery on credits and deposits combined with shift to higher margin products (from time deposits to saving accounts)
 - Further positive impact coming from reinvestment of new securities issued (some 18 m in 3Q 2009)
- Overall net interest margin at 1.54%

Business Unit Belgium (3)

F&C

AUM

- Net fee and commission income in line with previous quarter at 152m
 - Recovery from the low level in the beginning of the year confirmed, mainly based on improved mutual fund related fee income, following gradual improvement of the investment climate. Quarter on quarter decrease due to traditionally lower summer season in the mutual fund business.
 - Year on year decrease (-7%) due to lower level of assets under management
- Assets under management at 147bn
 - +2% quarter on quarter, -7% year on year

Operating expenses

Asset impairment

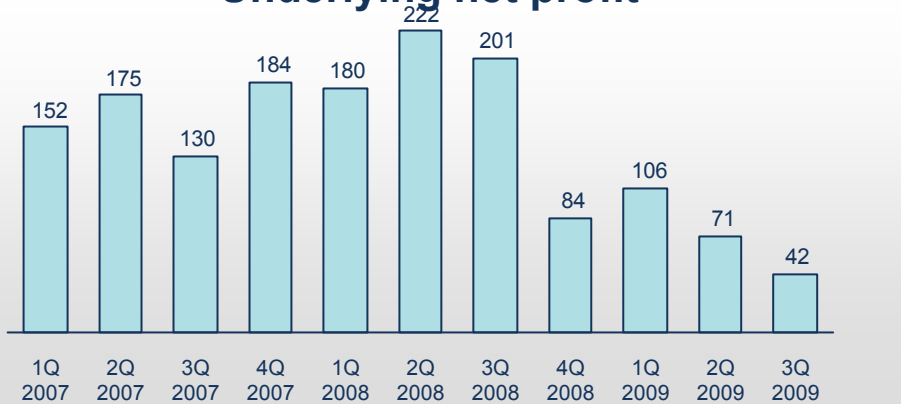

- Continued impact of ongoing cost containment measures reflected in lower operating expenses, both quarter on quarter (-1%) and year on year (-7%)
- Cost income ratio: 57%, (vs. 71% for full year 2008)
- Asset impairment still down from already very low levels in previous quarters. Year to date credit cost (0.12%) down 2bp compared with previous quarter. Unchanged NPL level, although late cycle increase cannot be excluded.

Business Unit CEER

Underlying net profit

Volume trend

| | Total loans | Of which mortgages | Customer deposits | AUM | Life reserves |
|--------------------|-------------|--------------------|-------------------|-------------|---------------|
| Volume | 34bn | 13bn | 41bn | 12bn | 2bn |
| Growth q/q* | -1% | 0% | -2% | +6% | +7% |
| Growth y/y | -1% | +14% | +4% | -12% | -17% |

*non-annualized

- Underlying profit CEER Business Unit at 42m
 - CEER profit breakdown: 109m Czech Republic, 5m Slovakia, 21m Hungary, -1m Poland, -31m Russia
- Negative evolution mainly on the back of higher loan loss charges
- Quarter on quarter organic reduction of loan book (-1%), most outspoken in Russia (-11%), and to a lesser extent in Hungary and Poland (both -2%). Deposit volumes -2% quarter on quarter, +4% year on year. Loan to deposit at 86%.
- Assets under management up 6% qoq (+4% organically)

Business Unit CEER (2)

Organic growth^(*)

| | Total loans | | Mortgages | | Deposits | |
|-----------|-------------|------|-----------|------|----------|------|
| | q/q | y/y | q/q | y/y | q/q | y/y |
| CZ | +0% | +2% | +2% | +17% | -1% | +3% |

| RU | -11% | -25% | -4% | -4% | +15% | +25% |

(*) organic growth excluding FX impact, q/q figures are non-annualized

KBC Business Unit CEER (3)

- Net interest income (461m) up +3% quarter on quarter
 - -2% net of FX effects following a build-down of loan book
- Year on year decrease based on lower volumes, especially in Russia and Hungary
- Net interest margin at 3.15% compared to 3.08% in previous quarter and 3.18% in year earlier quarter

Business Unit CEER (4)

F&C

AUM

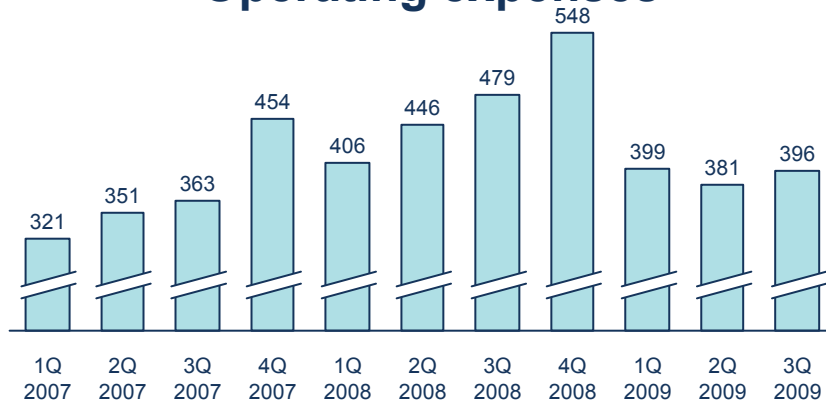

Amounts in bn. EUR

- Organically stable net fee and commission income (82m)
 - Net of FX effects flat quarter on quarter, +10% year on year
- Assets under management at 12.4bn
 - Net of FX effects +4% quarter on quarter based on increased asset prices

Business Unit CEER (5)

Operating expenses

Asset impairment

- Operating expenses (396m) down on organic basis both quarter on quarter (-2%) and year on year (-6%)
- Cost income ratio at 58% (60% FY 2008)
- Asset impairment at 214m, of which 203m on L&R
 - Rising credit cost mainly due to Russia (corporate) and consumer finance in Poland
 - NPL ratio at 4.3%, up from 3.1% in 1H09 and 2.1% end 08
 - Earlier given guidance for full year credit cost CEER business unit 200-230 bps maintained

Business Unit Merchant Banking

Underlying net profit

Volume trend

| | Total loans | Customer deposits** |
|--------------------|-------------|---------------------|
| Volume | 56bn | 54bn |
| Growth q/q* | -7% | -4% |
| Growth y/y* | -8% | -25% |

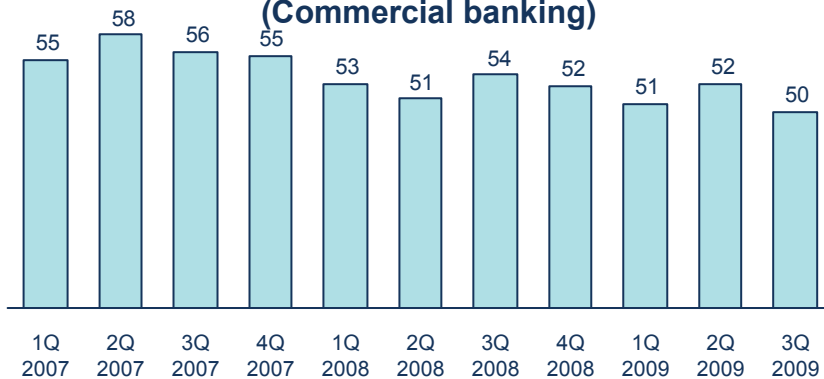

*non-annualized

** Figures restated due to reallocation of some institutional deposits from Belgium to Merchant Banking

- Significantly higher underlying net profit in Business Unit Merchant Banking (281m)
 - Commercial banking result 98m, thanks to falling corporate loan charges and the non recurrence of provisions in 2Q 09 relating to the reclassified US RMBS portfolio
 - Investment Banking result 98m based on good trading results

RWA banking & insurance

(Commercial banking)

NII (Commercial banking)

- Lower risk weighted assets commercial banking due to reduction international corporate loan book outweighing continued adverse rating migrations
- Net interest income (relating to the commercial banking division) up on average of last four quarters. Build down of international corporate loan book compensated by good margin environment and the reinvestment of new securities issued (+13m in 3Q 2009)

Business Unit Merchant Banking (3)

F&C

FV gains (Investment banking)

- Net fee and commission income up from previous quarter (+7m)
- Trading results, especially in the Brussels' dealing room, remain solid bringing the fair value gains for the investment banking division at 258m

Business Unit Merchant Banking (4)

Operating expenses

Asset impairment

- Operating expenses at 248m
 - In commercial banking division flat quarter on quarter and -9% year on year based on FTE decrease and lower variable pay
 - In investment banking division substantial increase (+21% qoq and +52% yoy) entirely based on reclassification of employee benefit tax costs from tax line to cost line and fact that previous quarter included 74m reversal of bonus accruals
 - Excluding these items, costs in investment banking down (-2% qoq, -19% yoy) as a result of lower FTE related to continued run down of the activities of KBC Financial Products, in line with strategic focus of the group
- Lower impairment (141m) mainly based on lower credit cost in international corporate lending and the absence of the 2Q provision for reclassified US mortgage backed securities portfolio
 - Credit cost ratio at 0.76% , 1.16% including impairment reclassified ABS

Update on Ireland

- After ytd loan impairment at 101m, Irish business contributes 68m to group profit
- NPL rising to 6.3% from 5.6% in previous quarter, bringing ytd credit cost to 74 bps
- 4.3% of loan portfolio has been restructured
- Though conditions are worsening, still 84% of portfolio considered to be low or medium risk
- Despite fall in house prices, indexed loan-to-value of mortgage portfolio at comfortable 82%, on average (though iLTV of 26% of portfolio has risen above 100%)
- Commercial real estate development exposure is limited to 4% of the portfolio

Irish loan book – key figures 3Q 2009

| <u>Loan portfolio</u> | <u>Outstanding</u> | <u>NPL 1H09</u> |
|--------------------------|--------------------|-----------------|
| Owner occupied mortgages | 10.1bn | 4.8% |
| Buy to let mortgages | 3.4bn | 6.2% |
| SME /corporate | 2.8bn | 3.9% |
| Real estate investment | 1.1bn | 11.3% |
| Real estate development | 0.6bn | 31.1% |
| | 18.1bn | 6.3% |

Business Unit Private Banking

Underlying net profit

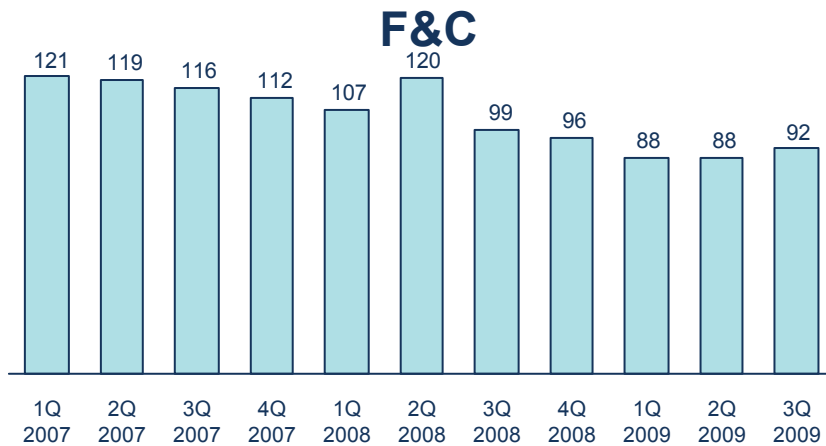

Volume trend

| | Customer deposits | AUM | Life reserves |
|--------------------|-------------------|-------------|---------------|
| Volume | 9bn | 47bn | 1bn |
| Growth q/q* | -6% | +5% | +6% |
| Growth y/y* | -26% | -7% | -20% |

**non-annualized*

- Underlying net profit European Private Banking (38m) slightly down on previous quarter due to some restructuring charges, but up 18% year on year
- Assets under management at 47bn
 - Quarter on quarter increase (+5%) based on increased asset prices, year on year decrease (-7%) due to a combination of price effects and net outflows

Business Unit Private Banking (2)

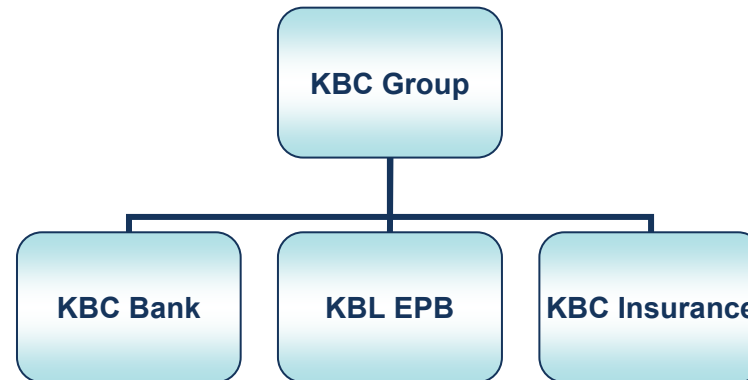

- Fee and commission income (92m) rising again after a number of relatively weak quarters.
 - 4% increase quarter on quarter based on better than expected on shore activities and higher assets under management
- Operating expense up 8% quarter on quarter largely driven by restructuring costs (+3% without these costs)

Solid solvency levels

- Focus on solvency at group level excluding double leverage effect
