Restatement of 2005 figures

Following the application by KBC of fair value hedge accounting for a portfolio hedge of interest rate risk (on the basis of the carved-out version of IAS 39 as approved by the EU) in the fourth quarter of 2005, KBC in the first quarter of 2006 decided to retroactively adapt its 2005 figures. An explanation and overview of the restatements is provided in Annex 1.

Shareholder information

Financial targets

On 7 December 2006, the group announced its new financial targets for the period up to and including 2009 (see table). On the same occasion, an updated capital planning, including a new share buyback programme, was announced (see further).

| Group financial targets | Target level | Change | to be achieved |
|---|--------------|----------------|-------------------------|
| Return on equity (ROE), group | 18.5% | (formerly 16%) | on average in 2007-2009 |
| Earnings per share (EPS) growth, group | 12% | (formerly 10%) | as CAGR in 2007-2009 |
| Cost/income ratio (CI), banking activities | 55% | (formerly 58%) | by 2009 |
| Combined ratio, non-life insurance activities | 95% | (unchanged) | by 2009 |
| Tier-1 ratio, banking activities | 8% | (unchanged) | in 2007-2009 |
| Solvency ratio, insurance activities | 200% | (unchanged) | in 2007-2009 |

Profitability and cost targets are based on the underlying results. Definition of ratios: see 'Annex 3'.

Shareholders

| Shareholders, 31-12-2006 ¹ | number | in % |
|---|-------------|--------|
| Ordinary shares | | * |
| Almancora | 75 980 000 | 20.9% |
| CERA | 23 345 499 | 6.4% |
| MRBB | 42 562 675 | 11.7% |
| Other core shareholders | 42 715 837 | 11.8% |
| Subtotal | 184 604 011 | 50.8% |
| KBC Group companies | 15 680 600 | 4.3% |
| <i>Related to the 1 billion share buy-back programme</i> | 8 229 723 | 2.3% |
| <i>Other</i> ² | 7 450 877 | 2.1% |
| Free float | 162 932 457 | 44.9% |
| Total | 363 217 068 | 100.0% |
| <i>Of which entitled to dividend in 2007</i> ³ | 352 870 300 | |
| Mandatorily convertible bonds (MCBs) ⁴ | 2 606 452 | |

¹ Data based on value date. For non-KBC shareholders: based on latest publicly know information.

² Includes, inter alia, shares held for ESOP. Excludes shares held in the trading books of KBC Securities, Ligeva and KBC Financial Products (incl. in free float).

³ Calculation of the number of shares entitled to dividend: chapter 'Consolidated financial statements', note 38.

⁴ Number of shares on conversion.

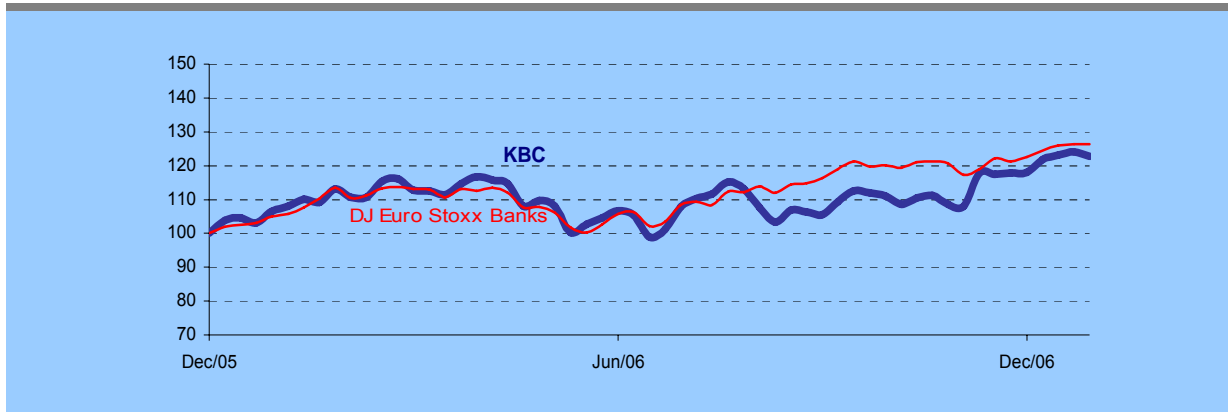

* The percentages are based on the numbers before cancellation (in 2007) of the remaining treasury shares relating to the 2006 share buyback programme.

At the end of 2005, KBC announced a share buyback programme for 2006. Under this programme, KBC intended to buy back 1 billion euros' worth of own shares in 2006 and cancel them. This programme was finished in the course of November 2006: in total 11.7 million shares were bought, at an average price of 85.08 euros per share. Of this total, already 3.5 million shares were cancelled at the Extraordinary General Meeting of 27 April 2006. The remaining treasury shares will in principle be cancelled at the Annual General Meeting of Shareholders of 26 April 2007.

End 2006, KBC announced a new share buyback programme for the next three years. The total amount of this programme is roughly 3 billion euros. The purchases will be effected on the open market. No dividend will be paid on these shares. Only when the total number of treasury shares at KBC Group exceeds 10% of the total number of shares, the (number in excess of this 10% of) shares will be cancelled. The size or maturity of the new programme may be adjusted in the case of significant changes in market conditions or following new important acquisition opportunities.

KBC share performance

Relative performance of the KBC share (31-12-2005 = 100)¹

Credit ratings

The long-term and short-term ratings for KBC Bank, KBC Insurance and KBC Group NV (the holding company) are mentioned in the table. Since 31-12-2005, there were two changes in these ratings:

- on 19 May 2006, Fitch upgraded the ratings of KBC Group NV from A+ to AA- (long term) and from F1 to F1+ (short term), based on new criteria for assigning ratings to bank and insurance holdings.
- on 18 December 2006, S&P's upgraded the ratings of KBC Bank from A+ to AA- (long term) and from A1 to A1+ (short term), of KBC Insurance from A+ to AA- (long term) and of KBC Group NV from A to A+ (long term).

| Ratings, 31-12-2006 | Long-term rating (+ outlook) | Short-term rating |
|---------------------------------------|------------------------------|-------------------|
| Fitch | | |
| KBC Bank | AA- (stable) | F1+ |
| KBC Insurance (claims-paying ability) | AA (stable) | F1+ |
| KBC Group NV | AA- (stable) | F1+ |

Overview, underlying figures

In order to provide more insight in the results, we provide, in this chapter, a number of 'underlying figures' (non-IFRS). The adjustments are related to the treatment of recognition of certain income components related to capital market activities, the treatment of certain ALM hedging derivatives and the exclusion of non-recurring items.

- In the IFRS P/L, the income related to trading activities is split over different components: while realized and unrealized capital gains are recognized under 'net gains from financial instruments at fair value', the funding costs and commissions paid in order to realize this trading income, are recognized under 'net interest income' and 'net fee and commission income' respectively. Moreover, part of the amounts mentioned under 'dividend income', 'net realized gains on available-for-sale assets' and 'other income' is also trading-related. In the 'underlying figures', all trading components (realized and unrealized gains, funding costs and related commissions paid, as well as the trading-related dividends, net realized gains on available-for-sale assets and other income) were shifted to 'net gains from financial instruments at fair value'.
- In the IFRS P/L, a large part of KBC's ALM-derivatives (those not falling under 'fair value hedge accounting for a portfolio hedge of interest rate risk') are treated as 'trading instruments' and hence interest on such derivatives is recognized under 'net gains from financial instruments at fair value', while interest on the underlying assets is recognized under 'net interest income'. In the 'underlying figures', the interest on these derivatives is shifted to 'net interest income' too (where interest on the underlying assets is already presented). Moreover, fair value changes (i.e. due to marking-to-market) of these ALM-derivatives are recognized under 'net gains from financial instruments at fair value', while not all underlying assets are fair valued (i.e. are on a non marked-to-market basis). The underlying figures hence exclude the fair value changes of these ALM-derivatives.
- Last but not least, in order to arrive at the figure for underlying group profit, factors that do not regularly occur during the normal course of business are eliminated from the profit figure. In view of their nature and magnitude, it is important to separate out these factors to fully understand the profit trend.

The adjusted P/L is provided below. A table reconciling 'net profit according to IFRS' and the 'underlying net profit' figures is added.

Financial highlights

4Q 2006

During the final quarter of 2006, customer loan growth accelerated, especially in Central Eastern Europe. The customer loan book expanded by 4% (+9% in Central Eastern Europe), bringing the year-to-date increase to 14% (26% in Central Eastern Europe). The outstanding volume of mortgages grew during the quarter by 4% (3% in Belgium and 11% in Central Eastern Europe).

After a traditionally weak third quarter, fee and commission income recovered strongly, driven by robust sales of retail mutual funds, and almost reached the exceptionally high level achieved in the last quarter of 2005, which had been underpinned by strong tax-driven sales in Belgium.

Capital market revenues were buoyant. On an underlying basis, net gains from financial instruments at fair value (mostly institutional trading profit) were 91% higher compared with the previous quarter.

The quarter also benefited from the divestment gain of 60 million euros from the sale - in Belgium - of the stake in Banksys/Bank Card Company.

As expected, and in line with the usual seasonal cost pattern, operating expenses were up significantly compared with the previous quarter. Among other factors, the stronger results from the capital market activities were a major driver behind the 5% underlying cost increase on the last quarter of 2005.

Impairment on loans (102 million euros) was higher than in previous quarters, chiefly in Hungary where loan provisioning was tightened given the more difficult local economic environment. Overall loan quality nevertheless remained sound (the non-performing-loan ratio for the group decreased to 1.6% from 1.8% at the beginning of the quarter).

FY 2006

2006 was another period marked by solid organic business growth. On a normalised basis, the customer loan portfolio grew by 14% (residential mortgages in this portfolio were up 18%), while assets under management and life reserves grew by 14% and 13%, respectively. Volume growth was buoyant in all geographical areas and in both the consumer and commercial segments. Activity on the capital markets also picked up considerably.

IFRS-reported gross income came to 12.6 billion euros. Adjusted for non-recurring income items (in various results headings) and net of technical charges (insurance), gross income increased by 415 million euros (5%). Net interest income (+5%), gains from financial instruments at fair value (+17%, mostly institutional trading profit), and fee and commission income (+3%) were the main contributors to this increase.

Costs remained well under control. At 4.9 billion euros, operating expenses were on a par with the year-earlier figure. Adjusted for extraordinary items, an increase of 182 million euros (4%) was recorded. Aside from normal cost inflation, factors boosting the cost level included higher variable expenses for the stronger capital market activities. The underlying cost/income ratio for the banking activities came to 58%.

Impairment recorded on assets amounted to 175 million euros compared with 103 million euros for 2005. Loan-loss charges increased, especially in Central Eastern Europe (Hungary), but remained at low levels. The corresponding loan-loss ratio stood at 0.13%.

For non-life insurance, another solid technical result was recorded. The net combined ratio came in at 96%.

Income tax expense increased 8% to 1.0 billion euros.

The share of third parties in the group result decreased following various minority buy-outs.

Group net profit for 2006 came to 3.4 billion euros, while underlying net profit amounted to 2.6 billion euros. This implies underlying profit growth of 11%. Underlying profit growth in Central Eastern Europe came to 30%, testifying to the region's role as a strong growth driver for the group.

On an underlying basis, a return on equity of 18% was achieved. The underlying return of the capital allocated to the Belgium Business Unit came in at 29% (roughly on a par with 2005), proving that the franchise provides a strong platform for generating earnings that can be invested in future expansion. The corresponding return on equity in other areas (net of all funding costs) stood at 25% for Central Eastern Europe, 21% for Merchant Banking and 29% for European private banking.

Overview of ratios

| Ratios ¹ | 31-12-2005 | 31-12-2006 |
|--|------------|------------|
| Return on equity | 18% | 24% |
| Return on equity, based on underlying results | 18% | 18% |
| Cost/income ratio | 60% | 53% |
| Cost/income ratio, based on underlying results | 58% | 58% |
| Combined ratio | 96% | 96% |
| Parent shareholders' equity per share (in EUR) | 43.8 | 49.2 |
| Tier-1 ratio (KBC Bank and KBL EPB) | 9.4% | 8.7% |
| Solvency ratio (KBC Insurance) | 385% | 374% |
| Loan loss ratio (neg. figure-> pos. impact on results) | 0.01% | 0.13% |
| Non-performing ratio | 2.2% | 1.6% |

¹ Annualised where relevant; for a definition of the ratios, see 'annex 3'.

● Operating highlights

Non-core shareholdings, such as in the Belgian industrial concern Agfa-Gevaert and the Spanish Banco Urquijo, were sold off. On the other hand, most minority interests in Central Eastern European subsidiaries were bought out (total consideration: 0.7 billion euros). KBC also acquired virtually all remaining minority interests in its private banking subsidiary, Kredietbank SA Luxembourgeoise.

Moreover, in line with group strategy, new opportunities for geographical expansion in Central Eastern Europe were explored, resulting in new investments being announced in Bulgaria, Romania and Serbia for an amount of some 0.4 billion euros.

In 2006, a 1-billion-euro share-buyback programme was completed, with 11.7 million shares being repurchased at an average price of 85.08 euros per share. A new share buyback programme for 3 billion euros was announced for the 2007-2009 period.

In 2006, a new organisational structure was introduced to enhance group steering capabilities and performance.

The mid-term financial targets were upgraded, the ambition being to boost recurring earnings per share by an average 12% a year and to deliver a return on equity of 18.5%, on average, in the 2007-2009 period.

● Information on the financial statements

In 2006, the average value of the Czech koruna relative to the euro increased by 5% compared with the average for 2005. Since non-euro profits are hedged against changes in the exchange rate, the net impact on earnings was negligible. Other currency value changes were less relevant.

The funding cost of the 2006 share buyback programme had a negative net earnings impact of about 12 million euros.

During 2006, a number of changes were made to the scope of consolidation. These related mainly to the buyout of minority interests in subsidiaries, as well as to the divestment from non-core assets. The combined earnings accretion of these transactions – apart from the amount of one-off divestment gains – came to around 50 million euros (recurring).

Earnings per share and the net asset value per share as at 31 December 2006 were calculated on the basis of 354.3 (period average) and 350.0 (at the end of the period) million shares, respectively. For this purpose, the number of mandatorily convertible bonds was added to the number of ordinary shares, while the number of treasury shares held was deducted. On the other hand, diluted earnings per share were calculated on the basis of 357.5 million shares (period average). Here, the number of outstanding share options was included.

● Balance sheet and parent shareholders' equity

| Highlights, consolidated balance sheet (in millions of EUR) | 31-12-2005 | 31-12-2006 |
|---|------------|------------|
| Total assets | 325 801 | 325 400 |
| Loans and advances to customers | 119 475 | 132 400 |
| Securities | 125 810 | 121 414 |
| Deposits from customers and debt securities | 171 572 | 180 031 |
| Gross technical provisions, insurance | 14 779 | 15 965 |
| Liabilities under investment contracts, insurance | 7 615 | 9 156 |
| Parent shareholders' equity | 15 751 | 17 219 |

On 31 December, parent shareholders' equity came to 17.2 billion euros (2.0 billion euros of which related to unrealised gains on the available-for-sale investment portfolio, mainly on shares). This represents an increase of 1.5 billion euros compared with the start of the year. The increase was due mainly to net profit accumulated in the course of the year, net, however, of dividends paid and treasury shares repurchased, which are deducted from shareholders' equity.

4Q 2006

IFRS-based gross income for the last quarter of 2006 came to 3 204 million and was marked by accelerating loan growth, robust sales of mutual funds and buoyant capital market revenues.

The customer loan book expanded during the quarter by 4% (+9% in Central Eastern Europe (abbreviated to CEE below)), bringing the year-to-date increase to 14%. Mortgages were up 4% q/q; 3% in Belgium and 11% in CEE, bringing the year-to-date increase to 12% and 39%, respectively.

The underlying net interest margin for the banking activities remained stable during the quarter at 1.45%, 3 bps lower than for 4Q 2005. Underlying net interest income improved slightly q/q and was 5% higher y/y.

After a traditionally weak summer, net fee income recovered strongly (up 38% q/q on an underlying basis), thanks chiefly to the sale of mutual funds, and almost reached the exceptionally high level of 4Q 2005, which had been underpinned by strong sales in Belgium in anticipation of the introduction of a new investment tax.

Net gains from financial instruments at fair value (mostly institutional trading profit) were up on an underlying basis by 91% q/q and 34% y/y.

The quarter was also impacted by non-recurring income items (+82 million) and negative fair value changes on non-qualifying ALM hedges (-7 million). The main non-recurring factors were the divestment gains from the sale of a minority stake in Banksys/Bank Card company (Belgium) and the sale of office buildings (Poland), which amounted to 60 million and 23 million, respectively (in the 'Other income' heading).

FY 2006

IFRS-reported net interest income (4 158 million) was 1% lower than for 2005, due to the higher interest charges incurred to finance the increased activity on the capital markets, which generated high trading revenues. On an underlying basis (i.e. disregarding interest income from trading activities and also adjusting for interest charges paid on ALM hedging instruments), net interest income went up by 5%. The increase came to 8% in Belgium and 7% in CEE. The (underlying) net interest margin for the banking activities for 2006 edged down 3 bps to 1.43%.

Premium income in the non-life insurance business came to 1 748 million, up 6% y/y. The increase came to 6% for both Belgium and CEE.

Reported premium income in life insurance (1 572 million) does not include certain forms of life products in compliance with IFRS, such as most unit-linked products. Otherwise, total sales of life insurance came to 4.1 billion, 64% of which was accounted for by unit-linked products. The sales volume was lower than for 2005, when it had been boosted by customers' anticipation of the introduction of a premium tax in Belgium. In 2006, the outstanding life reserves grew by another 13% compared with the end of 2005 (+11% in Belgium, +35% in CEE and +43% in the European Private Banking Business Unit).

Net fair value gains (1 370 million) were up markedly on the 2005 financial year, due chiefly to the significantly better performance of the Merchant Banking Business Unit on the capital markets (on an underlying basis: +37%) and upward fair-value adjustments of ALM hedging instruments (positive impact of 81 million but excluded from 'underlying income').

Realised gains on available-for-sale investments came to 513 million; although 187 million of this amount should be considered 'extraordinary' (it related to, among other things, the divestments out of Gevaert-related activities). In 2005, gains amounted to 458 million, 120 million of which were considered extraordinary. Excluding extraordinary items, gains were slightly lower than the 2005 figure (-3%).

Net fee and commission income amounted to 1 865 million; on an underlying basis, up 3% y/y. The increase came to 8% in Belgium, to 12% in CEE and – excluding the deconsolidation effect of Banco Urquijo – to 16% in European Private Banking. The upward trends were driven by buoyant sales of investment products and services. In the Merchant Banking Business Unit, however, underlying fee and commission income dropped by 19%, due to significantly lower alternative investment management fees. In 2006, total assets under management (AUM) went up to 209 billion, which corresponds to an increase of 17% to 143 billion in Belgium, of 39% to 10 billion in CEE and of 8% to 55 billion in European Private Banking (growth trend excluding the deconsolidation effect of Banco Urquijo). In Merchant Banking, assets managed dropped from 2.1 to 0.7 billion.

'Other income' amounted to 1 119 million, 545 million more than for the 2005 financial year, mainly due to the divestment gain on Banco Urquijo (excluded from underlying other income). On an underlying basis, other income was roughly on a par with the 2005 level.

4Q 2006

On account of higher income-based wage costs stemming from the strong increase in profits on the capital markets (Merchant Banking Business Unit) and in line with the seasonal cost pattern in Belgium and CEE, operating expenses were up significantly compared with the previous quarter (23% q/q on an underlying basis). Moreover, the quarter's cost level included net expense provisions of 14 million (compared with a net reversal of 26 million in 3Q 2006) and one-off charges in both CEE (25 million) and European private banking (9 million).

Stronger capital market activities were a major factor behind the 5% underlying cost increase compared with 4Q 2005. The underlying cost level in Belgium increased by 8% y/y, which can be put down not only to normal cost inflation, but also to a review of the staff profit-sharing scheme and higher IT investment charges. In CEE, the underlying cost level was 6% higher (4% discounting a 2% upward FX effect), mainly on account of higher wage costs.

FY 2006

On an IFRS-basis, operating expenses for 2006 were up only 9 million (+0%) compared with 2005. Adjusted for non-recurring cost items, an increase of 4% was recognised. Apart from normal cost inflation, factors boosting the cost level included higher profit-related staff expenses (chiefly) for the capital market activities (Merchant Banking).

The underlying cost increase came to 5% for Belgium and to 2% for the Central Eastern Europe Business Unit (4%, discounting the impact due to the use of expense provisions and to exchange rate fluctuations). Underlying expenses in the Merchant Banking Business Unit were up 16% - increased profits generated on the capital markets resulted in higher staff costs - while the European Private Banking Unit saw a 5% decrease in expenses (+4% excluding deconsolidation effects). The underlying cost level in the Group Centre improved substantially due to the downscaling of Gevaert-related activities in 2005.

For the 2006 financial year, the banking business recorded a C/I ratio of 53%. However, if the non-recurring factors are excluded, the ratio came to 58% (stable compared to 2005). In the Belgium Business Unit, the underlying C/I ratio stood at 58%, in CEE at 65%, in Merchant Banking at 50%, and in the European Private Banking Business Unit at 73%.

4Q 2006

The quarter under review was impacted by an asset impairment charge totalling 92 million.

The impairment charge on loans amounted to 102 million, which was higher than the loan losses recorded in the previous quarters. Loan loss charges were higher especially in Hungary, on the back of the more difficult local macroeconomic environment. The loan quality on other markets remained sound. At the end of 4Q 2006, the non-performing loan ratio for the group stood at 1.6%, down from 1.8% at the end of the previous quarter.

No impairment of any significance was recognised on securities investments or on the goodwill of participating interests.

Impairment reversals of 14 million were recorded under the 'other' heading and related mainly to the revaluation of real estate in Poland.

FY 2006

For the 2006 financial year, impairment on the loan portfolio amounted to 177 million, corresponding to a loan-loss ratio of 0.13% (compared with 0.01% for 2005).

During the course of 2006, no net impairment of any significance was recognised on securities portfolios, participating interests or on any other asset. In the 2005 financial year, impairment losses had been recorded on Gevaert-related assets (in both the 'goodwill' and 'other' headings of the Group Centre).

The loan-loss ratio came to 0.07% for the Belgium Business Unit (compared with 0% the previous year), to 0.58% in CEE (0.37% in 2005) and to 0% for both Merchant Banking and European Private Banking (the same as in the 2005 financial year).

The non-performing-loan ratio came down to 1.6% from 2.2% at the start of the year.

The percentage of cover for non-performing loans afforded by loan-loss provisions came to 100%, slightly higher than at the start of the financial year (99%).

Insurance results

FY 2006

During the year, net insurance results amounted to 535 million (515 million on an underlying basis, 29% higher than in 2005).

The net insurance result stood at 392 million in Belgium (+10%), 45 million in CEE (compared to just 5 million as recently as 2005), 90 million in the Merchant Banking Business Unit (down 7 million due to lower gains realised on the investment portfolio), 11 million in European private banking (8 million in 2005) and a negative 3 million in the Group Centre.

In non-life insurance, a solid technical result was recorded in all BUs. The group 2006 net claims ratio came in at 64%. The group net combined ratio stood at 96%: 95% for Belgium, 99% for CEE and 92% for the Merchant Banking Business Unit. All these combined ratios were stable compared with those for the 2005 financial year.

The non-life premium retention ratio was stable y/y at 93% while the claims reserve ratio went up to 176% from 174%.

Results per business unit

As a reminder, as of May 2006, the new management structure (announced at the end of 2005), was rolled out throughout the group. This management structure essentially breaks down the group into five business units: Belgium, Central Eastern Europe, Merchant Banking, European Private Banking, and Shared Services & Operations (such as ICT and logistics and 'product factories' such as payment systems, asset management, leasing and trade finance). The results of the Shared Services & Operations business unit are assigned to the other business units.

A definition and a detailed overview of results and commentary on the business units Belgium, Central Eastern Europe, Merchant Banking, European Private Banking and 'Group item' (see definition below) is provided in the next few sections of this report.

Results according to the legal structure of the group

Under IFRS, the main segment reporting ('primary segmentation') format used by KBC is based on the group's legal structure (see table below). More information and detailed figures are provided in the 'Consolidated financial statements' section, note 2a.

| Breakdown of net profit according to the legal structure of the group (in millions of EUR) | 1Q 2005 | 2Q 2005 | 3Q 2005 | 4Q 2005 | 1Q 2006 | 2Q 2006 | 3Q 2006 | 4Q 2006 | cumul. FY 2005 | cumul. FY 2006 |
|--|---------|---------|---------|---------|---------|---------|---------|---------|----------------|----------------|
| Banking | 529 | 341 | 443 | 432 | 742 | 561 | 423 | 474 | 1 745 | 2 201 |
| Insurance | 122 | 124 | 120 | 95 | 130 | 137 | 129 | 139 | 462 | 535 |

Belgium Business Unit

● Description

The 'Belgium' business unit includes all retail and private bancassurance activities in Belgium. More specifically, it includes KBC Bank (limited to the retail and private banking activities in Belgium), KBC Insurance (except for some specific items), as well as a number of Belgian subsidiaries (the main ones being CBC Banque, Centea, KBC Asset Management, Fidea and ADD).

● Commentary

4Q 2006

The net profit recorded in this BU came to 298 million, marked by a robust underlying revenue trend and (partly seasonal) higher costs.

Net interest income was on a par with the previous quarter on an underlying basis. The 1-bp narrowing of the banking interest margin (to 1.81%) was offset by continued volume growth. Total loan volume increased by 1% in the quarter (mortgage book: +3%), while deposits grew by 2%. Net interest income was up 8% compared to 4Q 2005.

After a traditionally weak summer, fee income made a strong recovery (up 34% q/q), thanks chiefly to sales of mutual funds. The income level again reached the extraordinarily high level of 4Q 2005, which had been underpinned by strong sales of unit-linked insurance products on the back of an impending tax change. Managed assets only edged up (1%), as they were adversely affected by the non-renewal of low-yield advisory retail mandates.

Earned premiums in the insurance activities were up 21% q/q, a better performance than in all the previous quarters of 2006, but they remained below the record level achieved in 4Q 2005. On the other hand, in the non-life business, higher claims charges – incurred in the normal course of business were recognised (Q4 claims ratio: 70%).

The result for the quarter benefited from the one-off gain on the sale of the participating interest in the Belgian payments settlement operator, Banksys/Bank Card Company, of 60 million (in the 'other income' heading and excluded from 'underlying profit'). Since this amount was non-taxable, the effective tax rate for the quarter (24%) ended at the low end of its average range.

As expected, operating expenses (501 million) were higher (+11% q/q), due to the review of the staff profit-sharing scheme (13 million), to higher IT costs (7 million) and to the seasonally higher administrative expenses such as those incurred for marketing efforts that traditionally take place in Q4. Besides normal cost inflation, the review of the staff profit-sharing scheme and the higher IT costs also accounted for the 8% increase in the underlying cost level compared with 4Q 2005.

Loan impairment losses remained low (14 million), although a gradual upward trend has been recorded over the last few quarters. In comparison, no net impairment had been recognised during the course of 2005. At the end of 4Q 2006, the non-performing-loan ratio stood at 1.5%, unchanged vis-à-vis the end of the previous quarter.

FY 2006

In the 2006 financial year, net profit came to 1 202 million, representing, on an underlying basis, 43% of the group total, and corresponding to an underlying return on allocated capital of 29%. The net insurance result stood at 392 million (+34%), while KBC private banking contributed 78 million (+22%).

Loan growth was robust (+8%), particularly in the consumer segment, where 12% growth in the mortgage book was recorded. Risk-weighted assets grew by 10%. The banking interest margin narrowed to 1.88% (versus 1.97% for 2005), as a result of the flattening of the yield curve. On balance, underlying net interest earnings (i.e. adjusted for interest charges on hedging instruments) went up 8%.

Net fees and commissions were up 8% to 895 million, thanks chiefly to the sale of structured mutual funds and retail investment services. At the end of the year, AUM (143 billion) stood 17% higher than a year earlier (13% new inflows and 4% fund performance). Belgian life reserves went up by 11% to 19 billion.

Non-life insurance premiums (829 million) grew by 6%, with sustained strong technical results. The combined ratio was stable at 95%.

Gains realised on available-for-sale securities amounted to 249 million (256 million in 2005), and related almost completely to the active management of the equity portfolio of the insurance business.

A one-off gain of 60 million was recognised under the 'other income' heading on the sale of the participating interest in Banksys/Bank Card Company, but was excluded from 'underlying profit'.

The level of operating expenses (1 824 million) rose by 5% on an underlying basis. Aside from normal wage inflation (around 3%), other factors accounting for the higher staff charges included the review of the staff profit-sharing remuneration scheme. The C/I ratio for the banking activities ended at 58%.

Credit quality remained favourable, resulting in a loan loss ratio of a mere 7 bps. In 2005, the loan loss ratio had stood at zero (a 22-million net impairment reversal had even been recorded).

Central Eastern Europe Business Unit

● Description

The 'Central Eastern Europe' business unit encompasses all banking and insurance activities (retail and private bancassurance, as well as merchant banking) in Central Eastern Europe:

- in the Czech and Slovak Republics: ČSOB (bank), ČSOB Pojist'ovna (Czech Rep.) and ČSOB Poist'ovna (Slovakia)
- in Hungary: K&H Bank and K&H Insurance
- in Poland: Kredyt Bank and Warta
- in Slovenia: Nova Ljubljanska banka (NLB - minority participation) and NLB Vita.

● Commentary

4Q 2006

This BU's net profit contribution came to 80 million and was marked by a robust underlying revenue trend. However, this was offset by rising loan impairment losses (essentially in Hungary) and (partly seasonal) higher costs.

Net interest income increased – on an underlying basis – by a solid 10% on the previous quarter. The banking interest margin expanded by 0.26% to 2.70%, driven by higher market rates and a positive mix effect (lower share of low-spread interbank activities). Customer loan growth accelerated (9% q/q) and was strong in both the consumer segment - the mortgage portfolio was up 11% q/q – and the commercial segment. Deposits, on the other hand, were down 5% q/q, due to the non-renewal of some large corporate deposits (and partly also to the shift from retail deposits to mutual funds). Net interest income was up 10% compared to 4Q 2005.

During the quarter under review, net fee and commission income (83 million) was up 10% q/q following a slowdown in growth during the summer. Factors fuelling this trend included the 9% increase in mutual and pension funds under management.

Sales of life products remained buoyant (although, from an accounting perspective, this was only partly reflected in the 'premium income' heading), boosting life reserves by 13% during the quarter under review. Compared with a year earlier, life reserves ended 35% higher.

In the non-life sector, gross premium earnings (166 million) ended on a par with the previous quarters and up 6% year-on-year.

Technical charges for the insurance activities (167 million) were at a favourable level compared to both 4Q 2005 and 3Q 2006, since these periods had been negatively impacted by the marking-to-market of life reserves (impact in both cases of roughly a negative 20 million).

The result for the quarter benefited from a one-off gain on the sale of office buildings in Poland for an amount of 23 million, pre-tax (in the 'other income' heading, but excluded from 'underlying profit').

Operating expenses amounted to 397 million. The cost level was significantly higher than for the previous quarter (+21% q/q) on the back of higher staff expenses (especially in the Czech Republic), seasonal administrative expenses and expense provisions for commercial litigation and restructuring in Poland (10 million). In the Czech Republic, the cancellation of an existing stock option plan (part of the planned squeeze-out of minority shareholders) added 19 million to the cost base, while another 6 million in staff charges were booked due to a one-off change in the accounting treatment of untaken holidays. The cost level y/y was 6% higher (4% when discounting a 2% upward FX effect), mainly because of higher wage costs.

Asset impairment charges rose to 64 million, mainly due to higher loan-loss charges in Hungary. Here, the loan provisioning policy was tightened on account of the more difficult economic environment. A new loan quality review resulted in 18 million being allocated to portfolio-based provisions, while another 35 million was set aside for a range of individual corporate debtors. In the Czech and Slovak Republics, impairment was higher q/q too, but remained lower than, for instance, the 4Q 2005 level. In Poland, no significant net impairment has been recorded for many quarters (moreover,

Q4 also saw a 10-million impairment reversal on real estate in Poland). At the end of 4Q 2006, the non-performing loan ratio stood at 2.4%, down from 3.0% at the end of the previous quarter.

FY 2006

In 2006, a net profit was recorded of 464 million (+30% y/y on an underlying basis), with an underlying return of 25% on allocated capital. As a rule, these figures are presented net of funding costs for the acquisition amounts paid. The BU's underlying earnings represented 17% of the group total.

Underlying profit in the Czech and Slovak Republics stood at 346 million, in Poland at 136 million and in Hungary at 58 million. For the region as a whole, the insurance companies contributed 45 million. The underlying 'other results' (-114 million) related to the funding charges for our participations (negative impact on profit of 101 million for 2006), minority interests in profit (a negative 50 million), the profit contribution of the minority shareholding in Slovenia (a positive 33 million) and some consolidation adjustments.

Loan growth in the region was robust: customer loans and risk-weighted assets were up 26% and 28%, respectively, compared with the start of the year, while the mortgage book edged up by 39%. Customer deposits ended 11% higher.

The banking interest margin has risen quarter after quarter since the spring of 2006, but the yearly average still ended 16 bps lower at 2.53% compared with the 2005 average. On balance, an underlying 7% increase in net interest earnings was recorded.

A net 311 million in fees and commissions were earned, 12% more than in the 2005 financial year. This had to do in large part with the growing share of investment fund sales in revenue. At the end of the year, AUM grew to 10 billion, up 39% (23% of which was due to new money inflows).

The sum of dividends received (6 million) and realised gains on securities investments (29 million) was on a par with the figure recorded for 2005, as was (almost) – on an underlying basis – the fair-value income from treasury and money markets activities.

'Other income' in 2006 amounted to 206 million; this included the income realised on the disposal of office buildings in Prague in Q1 (34 million, gross), part of the non-performing loan portfolio in Poland in Q2 (37 million, gross) and office buildings in Warsaw in Q4 (23 million, gross). Income items not generated in the normal course of business were excluded from 'underlying profit'.

Operating expenses stood at 1 338 million. The underlying cost trend came to +2% (+4% discounting the impact of using or reversing expense provisions set aside in previous years and of exchange rates). The underlying C/I ratio for the banking activities fell to 65% from 70%.

Impairment on the loan portfolio amounted to 146 million, corresponding to a loan-loss ratio of 0.58%. The ratio came to 0.36% for the Czech and Slovak Republics (compared with 0.40% the previous year), 0% in Poland (stable y/y) and 1.50% in Hungary (up from 0.69%).

The effective tax rate stood at 16%, somewhat higher than for 2005 (12%), which had benefited from tax credits in Poland.

The share of minority interests in the group's full-year profit went down from 18% to 10% following several minority buy-outs during the course of the year.

Note

In Annex 2 of this report, detailed income statements for the Czech & Slovak Republics, Hungary, Poland and a category entitled 'Other' are provided. 'Other' includes the results of NLB and NLB Vita in Slovenia, the allocated funding cost of goodwill, minority interests at the level of KBC in the Central Eastern European subsidiaries, consolidation adjustments and some operating expenses at head office related to Central Eastern Europe.

Merchant Banking Business Unit

● Description

The 'Merchant Banking' business unit encompasses the services provided to corporate customers (including large SMEs) and all capital market activities, but not those of the Central Eastern European group companies.

More specifically, it includes the merchant banking activities of KBC Bank in Belgium, its foreign branches, as well the subsidiaries (only the main ones are mentioned) IIB Bank and KBC Finance Ireland in Ireland, KBC Bank Deutschland in Germany, KBC Bank Nederland and KBC Clearing in the Netherlands, Antwerp Diamond Bank (various locations), KBC Lease (various locations), KBC Securities (various locations), KBC Financial Products (various locations), KBC Peel Hunt in the UK, KBC Private Equity and Secura in Belgium, Assurisk in Luxembourg, and various financing companies.

● Commentary

4Q 2006

The profit contribution for the quarter under review came to 217 million, of which 110 million came from commercial banking activities and 107 million from investment banking.

On an underlying basis, the quarter result was up 41% q/q due to the strong recovery in capital market activities, and remained on a par with the 4Q 2005 profit amount, as strong capital market earnings offset the non-recurrence of loan-loss impairment reversals made at that time.

Underlying income from trading activities in the investment banking units came in at 294 million, much higher than the average of the preceding 2005-2006 quarters (195 million), but lower than the record level of 340 million recorded in 1Q 2006.

The net interest result of the BU came to 208 million, which corresponds with 279 million on an underlying basis. Underlying net interest income, which is related to commercial banking activities, remained on a par with the previous quarter and was 16% higher than the year-earlier figure. Over the past twelve months, risk-weighted assets have grown by 10% (+13% for commercial banking and -3% for investment banking).

Fee and commission income amounted to 54 million, more than triple the previous quarter's performance (on an underlying basis), which had been seasonally weak. Compared with 4Q 2005, the income component remained stable on an underlying basis, whereby the growth in the commercial banking segment (+16%) was offset by the decline in the investment banking segment related to the downscaling of institutional AIM activity.

On balance, total income reached a record level of 761 million; on an underlying basis up 48% q/q and 9% y/y.

Operating expenses (357 million) rose in line with the revenue growth trend (on an underlying basis, +47% q/q and +10% y/y), due chiefly to the high level of profit-sharing staff remuneration in the capital market activities. In addition, provisions were recorded in the amount of 21 million (chiefly) for commercial litigation.

Impairment losses for problem loans remained limited to a mere 12 million. The non-performing-loan ratio stood at 1.2%, down from 1.4% at the end of the previous quarter.

FY 2006

In the 2006 financial year, net profit came to 872 million, 66% of which was accounted for by commercial banking activities (576 million) and 34% by investment banking activities (296 million). The BU's underlying net profit was up 6% y/y on the back of solid revenue growth, especially in the investment banking division, but this was partly offset by higher result-based staff remuneration. Moreover, the BU achieved an (underlying) return on allocated capital of 21%.

Risk-weighted assets were up by 10% (+13% for commercial banking and -3% for investment banking), while gross income (2 758 billion) ended 9% higher y/y on an underlying basis.

The upward revenue trend was characterised by solid trading results especially from the derivatives and structured credit business. Trading and other fair-value income (combined underlying amount of 992 million) were up 37% on an underlying basis.

Underlying net interest income, which is related to the commercial banking activity, was up 5%.

An underlying net amount of 286 million in fees and commissions was earned, 67 million less (-19%) than for 2005, due chiefly to the decline in institutional investment management fees (hedge fund strategies).

Gross earned premiums in the inbound re-insurance activity grew by 9% to 318 million. With a stable combined ratio of 92%, the underwriting result remained sound. The net profit contribution from these insurance activities (90 million), however, came in slightly lower due to a drop in investment results, which had been exceptionally high in 2005.

The BU's underlying cost trend came to +16% for 2006. The change in the business mix (bigger share of investment banking) explains why the underlying C/I ratio for the banking activities was up from 48% to 50%.

Credit quality remained favourable, resulting in a zero loan-loss ratio, on a par with the 2005 financial year, when a net impairment reversal of 36 million had been recorded.

Note

A breakdown of the Merchant Banking business unit figures into 'Commercial Banking' and 'Investment Banking' is provided in annex 2.

European Private Banking Business Unit

● Description

The 'European Private Banking' business unit encompasses the activities of the KBL 'European Private Bankers' group (KBL EPB). More specifically, it includes Kredietbank SA Luxembourgeoise and its subsidiaries throughout Europe, as well as the insurance company VITIS Life in Luxembourg.

● Commentary

4Q 2006

This BU contributed 34 million to 4Q profit, a decline attributable to lower non-core income and a higher (non-recurring) cost level.

Following a somewhat weaker summer quarter, fee and commission revenue from private banking and global custody services recovered to 111 million (+7% q/q), while AUM went up to 55 billion, a 2% increase (+6% for onshore private banking, -1% for offshore, institutional and low-yielding assets). However, total revenue (176 million) edged down on an underlying basis by 8% q/q, essentially on the back of the downsizing of non-core activities. Over the past few quarters, some non-core businesses, such as commercial lending and capital market activities, have been gradually scaled down. Total risk-weighted assets declined 33% y/y (this included the deconsolidation of Banco Urquijo), which had an adverse effect on the revenue trend. Compared with 4Q 2005, and excluding any significant impact of changes to the scope of consolidation, underlying gross income increased by 8%.

Operating expenses amounted to 132 million, up 9 million q/q (+8%) on an underlying basis, due to one-off staff pension insurance expenses (9 million) and restructuring charges (6 million). The cost level was down by 4 million compared with 4Q 2005, chiefly due to the deconsolidation of Banco Urquijo. The 4Q 2005 cost level also benefited from a net writeback of restructuring charges of 16 million.

In the last quarter of the year, a tax recovery of 10 million was recorded. This was the result mainly of adjusting previous quarter bookings and aligning IFRS accounts-based taxes with local tax regulations.

As of Q4, the share of minority interests in the group results came to zero after KBC (virtually) completed the buy-out of minority interests in Kredietbank SA Luxembourgeoise.

FY 2006

For the 2006 financial year, a profit contribution of 678 million was recorded. The year was marked by divestiture from Spain through the sale of Banco Urquijo, which generated a value gain of 0.5 billion (in the 'other income' heading, but excluded from 'underlying profit' as it is a one-off item).

Underlying net profit came to 181 million, generating a corresponding return on allocated capital of 29%. The private banking activities accounted for 73% of the BU's results (132 million), while the contribution from global custody and related services accounted for 22% (39 million). The remainder entails 'other' activities, such as corporate lending, treasury etc., that have been scaled down. The share of the BU's underlying result in the group total came to 7%.

Over the past twelve months, customer assets under management grew by 8% to 55 billion (disregarding the deconsolidation of Banco Urquijo). There was a 15% increase registered for the on-shore private banking activities (accounting for 24 billion of AUM), of which 9 pp net new inflows. In contrast, as in previous years, the off-shore business was a low growth area (+1%).

After the divestment from Banco Urquijo and the announced sale of the Italian subsidiary, activities have become more focused on the Benelux (37 billion in AUM) and the neighbouring countries: Germany (7 billion), the UK (4 billion) and France (3 billion, including Monaco). In Switzerland, an amount of 4 billion is managed.

The 2006 profit trend was underpinned by steady growth in fee and commission income from wealth management and global custody services of 16% excluding the deconsolidation effect of Banco Urquijo.

On the other hand, in line with the business strategy, non-core businesses (such as commercial lending and capital market activities) were gradually scaled down, which had an adverse effect on the revenue trend.

The BU's operating expenses (542 million) declined by 5%; excluding the effect of deconsolidation, a 4% increase was recorded. The C/I ratio stood at 73%, leaving room for further improvement. No net impairment on assets was recognized.

Note

Besides the capital gain of 0.5 billion euros, the deconsolidation of Banco Urquijo since 1 July 2006 also provoked a decrease in most other P/L items, the main ones being (figures on a quarterly basis - based on to the average contribution of Banco Urquijo in 1Q 2006 and 2Q 2006) net interest income (10 million euros), net gains from financial instruments at fair value (4 million euros), net fee and commission income (18 million euros), operating expenses (-27 million euros) and impairments (-3 million euros).

Group centre

● Description

The 'Group Centre' mainly comprises KBC Group NV (mainly the cost of leveraging at holding-company level, group strategy-related expenses and Gevaert (which was merged with KBC Group NV)), part of KBC Bank and KBC Insurance (inter alia the dividends and gains on a number of non-strategic equity holdings, and a limited number of non-allocated costs), Fin-Force, and the elimination of intrasegment transactions.

● Commentary

4Q 2006

In the last quarter, results not derived from the BUs came to a net 3 million. The settlement of tax-related receivables had a 30-million positive impact on profit (in the 'other income' heading).

FY 2006

The net result for FY 2006 came to 214 million for 2006. It mainly entailed:

- 27 million in profit from the holding company KBC Group NV, including the positive impact of the divestment from Agfa-Gevaert and the merger of Gevaert and KBC Group NV in the first half of 2006;
- 165 million (net) in dividends and gains realised on the centrally managed portfolio of equity holdings of KBC Bank NV.

Group Centre profit incorporates 247 million in one-off factors. Disregarding these factors, the net contribution for 2006 came to a negative 33 million.

Condensed consolidated cash flow statement

A full cash flow statement will be available in the annual report.

● Notes on the accounting policies

Provided below is a selection of notes to the accounts. The numbers and titles of the notes that will only appear in the annual report, but not in the quarterly reports, are shown below solely to ensure there is a link with the annual report. The annual report will be available on the web site www.kbc.com.

Note 1a: Statement of compliance

The consolidated financial statements of the KBC group have been prepared in accordance with the International Financial Reporting Standards ('endorsed IFRS') as adopted for use in the European Union.

The consolidated financial statements of KBC present one year of comparative information.

In 2005, the group qualified as a first-time adopter of IFRS. The adjustments stemming from the first-time adoption of IFRS were reflected in the opening balance sheet at 1 January 2004, except for items related to IAS 32, IAS 39 and IFRS 4 (in the opening balance sheet at 1 January 2005).

Note 1b: Summary of significant accounting policies

A summary of the main accounting policies is provided in the annual report. In 2006, no changes in content were made in the accounting policies that had a material impact on the results.

Restatement of the 2005 reference figures: see 'annex 1'.

● Notes on segment reporting

Note 2a: Reporting according to the legal structure of the group

Under IFRS, the 'primary segment' reporting format used by KBC is based on the group's legal structure.

As in 2006 Gevaert was merged with KBC Group NV (the holding company) and KBC Asset Management became a majority-owned subsidiary of KBC Bank, the former Asset Management and Gevaert 'primary IFRS segments' ceased to exist and, since then, KBC distinguishes only between the following primary segments:

- Banking: KBC Bank and its subsidiaries (also including KBC Asset Management);
- Insurance: KBC Insurance and its subsidiaries;
- European Private Banking: Kredietbank SA Luxembourgeoise and its subsidiaries;
- Holding Company Activities: mainly KBC Group NV on a non-consolidated basis, KBC Exploitatie and Almafin group (a former subsidiary of Gevaert);
- Intersegment transactions are transactions conducted between the different primary segments at arm's length. As a number of items are reported on a net basis (e.g., net interest income), the balance of the intragroup transactions for these items is immaterial. Intersegment transfers are measured on the basis actually used to price the transfers.

The figures for the holding-company activities also include the 'cost-sharing structure', which comprises a number of common support services such as marketing, logistics, IT and communication. Costs incurred by this cost-sharing structure are paid by the holding company and afterwards charged to the other segments. Hence, these amounts are shown both under expenses and under income (income from costs that have been passed on) in the 'holding-company activities' segment, and under expenses in the other segments.

N.B.: The 2005 reference figures were restated as a consequence of:

- the already mentioned changes relating to the application of the 'fair value hedge accounting for a portfolio hedge of interest rate risk', see Annex 1, and
- the retroactive use of the breakdown according to the simplified legal structure (see above).

| Total liabilities | 259 993 | 26 161 | 19 913 | 880 | | 306 947 |

Note 2b: Reporting by geographic segment

The IFRS 'secondary segment' reporting format is based on geographic areas, and reflects KBC's focus on its two home markets – Belgium and Central Eastern Europe – and its selective presence in other countries ('rest of the world', i.e. mainly Western Europe excluding Belgium, the US and Southeast Asia).

The geographic segmentation is based on the location where the services are rendered. Since at least 95% of the customers are local customers, the location of the branch or subsidiary determines the geographic breakdown of both the balance sheet and income statement.

More detailed geographic segmentation figures for balance sheet items are provided in the various notes to the balance sheet. The breakdown here is made based on the geographic location of the counterparty.

N.B.: 2005 restated gross income figures, see Annex 1.

| In millions of EUR | Belgium | Central Eastern Europe | Rest of the world | Inter- segment elimi- nations | KBC Group |

Notes to the income statement

General remark:

All data in this chapter are based on IFRS. However, from an analytical point of view (for instance, due to the treatment of recognition of certain income components related to capital market activities and the treatment of certain ALM hedging derivatives), it may be useful to look at additional 'underlying' figures. These 'underlying' data are provided in the chapter 'Group results' (which is not part of the 'Consolidated Financial Statements').

Note 3: Net interest income

| In millions of EUR | 4Q 2005 | 3Q 2006 | 4Q 2006 | cumul FY 2005 | cumul FY 2006 |
|--|--------------|--------------|--------------|------------------|------------------|
| Total | 1 061 | 1 025 | 1 047 | 4 219 | 4 158 |
| Interest income | 2 715 | 3 022 | 3 131 | 10 390 | 11 927 |
| Loans and advances to banks | 400 | 581 | 582 | 1 428 | 2 220 |
| Loans and advances to customers | 1 321 | 1 415 | 1 555 | 5 180 | 5 679 |
| Deposits with ceding companies | 1 | 1 | 3 | 4 | 6 |
| Fixed-income securities not measured at fair value through profit and loss | 590 | 511 | 548 | 2 220 | 2 227 |
| <i>Subtotal, interest income for financial assets not measured at fair value through profit and loss</i> | <i>2 312</i> | <i>2 508</i> | <i>2 687</i> | <i>8 832</i> | <i>10 132</i> |

| Total | 251 | 153 | 370 | 642 | 1 370 |
| Trading instruments (including trading derivatives) | 251 | - 36 | 285 | 209 | 1 187 |
| Other financial instruments at fair value | - 254 | 65 | - 101 | - 95 | - 345 |
| Portfolio hedge of interest rate risk | 0 | 0 | 0 | 0 | 0 |
| Foreign exchange trading | 254 | 124 | 186 | 528 | 528 |

N.B.:

- 2005 restated figures, see Annex 1.

Note 6: Net realized gains from available-for-sale assets

| In millions of EUR | 4Q 2005 | 3Q 2006 | 4Q 2006 | cumul 12M 2005 | cumul 12M 2006 |
|-------------------------|---------|---------|---------|-------------------|-------------------|
| Total | 144 | 86 | 69 | 458 | 513 |
| Fixed-income securities | 38 | 2 | 1 | 99 | 35 |
| Shares | 107 | 84 | 68 | 360 | 477 |

Note 7: Net fee and commission income

| In millions of EUR | 4Q 2005 | 3Q 2006 | 4Q 2006 | cumul 12M 2005 | cumul 12M 2006 |
|---|---------|---------|---------|-------------------|-------------------|
| Total | 528 | 390 | 508 | 1 819 | 1 865 |
| | | | 0 | | |
| Fee and commission income | 780 | 662 | 782 | 2 693 | 2 977 |
| Securities and asset management (including from investment contracts) | 530 | 465 | 555 | 1 800 | 2 093 |
| Commitment credit | 30 | 35 | 42 | 135 | 152 |
| Payments | 106 | 107 | 111 | 405 | 417 |
| Other | 114 | 55 | 73 | 352 | 315 |
| Fee and commission expense | - 252 | - 272 | - 273 | - 874 | - 1 112 |
| Acquisition costs | - 97 | - 96 | - 111 | - 382 | - 403 |
| Other | - 154 | - 177 | - 163 | - 492 | - 710 |

N.B.:

- As of 2Q 2006, 'dividend income' related to securities lending is reclassified to 'net fee and commission income'. For FY 2006, it concerns 49 million euros (of which 5 million euros in 4Q 2006).

Note 8: Other income

| In millions of EUR | 4Q 2005 | 3Q 2006 | 4Q 2006 | cumul 12M 2005 | cumul 12M 2006 |
|---|---------|---------|---------|-------------------|-------------------|
| Total | 130 | 631 | 218 | 574 | 1 119 |
| of which: Slovak Collection Unit award* - CSOB | 0 | 0 | 0 | 101 | 0 |
| of which: impact of sale bad loans - Kredyt Bank | 0 | 0 | 0 | 0 | 37 |
| of which: realised gain on sale buildings - CSOB | - 4 | - 1 | 1 | 0 | 36 |
| of which: realised gain on sale of Banco Urquijo - KBL EPB | 0 | 501 | 0 | 0 | 501 |
| of which: realised gain on sale of Banksys and BCC - KBC Bank | 0 | 0 | 60 | 0 | 60 |
| of which: realised gain on building - Warta | 0 | 0 | 23 | 0 | 23 |

*Related to the settlement of an unpaid loan to the Slovak government.

N.B.:

- The amount reported under 'Other income' generally includes income from operating leases, amounts recovered under guarantees, rental income, realised gains on property and equipment and investment property, and amounts recovered on loans that have been written off in full.

Note 9: Technical accounts, insurance

The technical accounts in the table differ from the presentation in the consolidated income statement of KBC Group. The main differences are:

- a breakdown is provided of insurance contracts (life versus non-life), investment contracts (with and without Discretionary Participation Feature (DPF)) and the non-technical account;
- technical charges include the internal cost of handling non-life claims;
- the investment income and charges include the internal cost of investment management. In the group income statement, the investment income is broken down into the various items on the income statement (net interest income, dividend income, net gains from financial instruments at fair value, net realised gains from available-for-sale assets, net fee and commission income and other income).

N.B.: Figures for premium income **exclude** the investment contracts without DPF, which roughly coincide with the **unit-linked products**.

| In millions of EUR | Insurance contracts, Life | Insurance contracts, Non-Life | Insurance contracts, Total | Investment contracts with DPF (Life) | Investment contracts without DPF (Life) | Non-technical account | TOTAL |

| in number of shares | 31-12-2005 | 31-12-2006 |
|--|-------------|-------------|
| Total number of shares issued and fully paid up | 369 206 475 | 365 823 520 |
| Ordinary shares | 366 566 637 | 363 217 068 |
| Other equity instruments | 2 639 838 | 2 606 452 |
| of which ordinary shares that entitle the holder to a dividend payment | 366 431 731 | 352 870 300 |
| of which treasury shares | 9 191 599 | 15 823 991 |

The share capital of KBC Group NV consists of ordinary shares of no nominal value and mandatorily convertible bonds (MCBs – see 'Other equity instruments' in the table).

At 31 December 2006, there were 363 217 068 ordinary shares in circulation. No participation certificates or non-voting shares have been issued. The shares are quoted on Euronext Brussels and on the Luxembourg Stock Exchange. The par value per ordinary share (issued and paid up share capital per ordinary share) amounted to approximately 3.40 euros at 31 December 2006. There are no shares issued that have not been fully paid.

The authorisation to increase capital may be exercised until 17 June 2009 for an amount of 198 876 943 euros (which, based on the par value of the shares at the end of 2006, may lead to the issue of maximum 58.5 million new shares).

At 31 December 2006, KBC group companies held 15 823 991 KBC shares (15 680 600 excluding the shares held in the trading book of KBC Securities, Ligeva and KBC Financial Products). This number includes, inter alia:

- the shares that are held to meet requirements under the various employee stock option plans (as at 31 December 2006: 2 323 332 shares).
- the shares that were bought in 2006 in relation to the 1-billion-euro share buyback programme announced at the end of 2005. This programme was finished in November 2006; by then 11 729 723 shares were bought under this programme, at an average price of 85.08 euros per share. Of this total, 3.5 million were already cancelled at the Extraordinary General Meeting of 27 April 2006; the remaining shares will in principle be cancelled following the next General Meeting.

The calculation of the number of shares entitled to dividend takes into account that the shares issued in relation to the 2006 capital increase for the staff will only be entitled to dividend as of the financial year 2007 (117 045 shares) and the fact that it is proposed to the AGM not to pay dividend on the remaining treasury shares in relation to the 2006 buyback programme (8 229 723 shares) as well treasury shares bought in relation to the 2007-2009 buyback programme.

At 31 December 2006, there were 2 606 452 1998-2008 MCBs in circulation, for a nominal amount of 182 529 624 euros, with a maturity date of 30 November 2008 and a base rate of 3.5% (as of 2000, related to changes in the dividend on the KBC share), which had not yet been converted into ordinary shares. Holders of these MCBs are entitled, until 30 November 2008, to request that their MCBs be converted according to a ratio of one KBC ordinary share for one MCB. MCBs which have not been converted by their holders will be converted automatically into ordinary shares at maturity. MCBs only carry voting rights when converted into ordinary shares.

N.B.: Preferred trust securities are not included in parent shareholders' equity, but in minority interests. At 31 December 2006, there were no freely convertible bonds outstanding.

| Solvency surplus (in millions of EUR) | 2 326 | 2 423 |

The table shows the solvency calculated for KBC Insurance, based on IFRS principles. The solvency ratio calculated in this way came to 374% at 31 December 2006.

Note 45: Risk Management

Extensive risk management data for 31-12-2006 will be provided in KBC's 2006 Annual Report. A summary of this information is provided below. For an explanation regarding the methodology used, please refer to the 2005 Annual Report.

Credit risk data

The main source of credit risk is the loan portfolio of the bank. A snapshot of this portfolio is shown in the table below. It includes all payment credit, guarantee credit (except for confirmations of letters of credit and similar export-/import-related commercial credit), standby credit and credit derivatives, granted by KBC Bank and KBL EPB to private persons, companies, governments and banks. Bonds held in the investment portfolio are included if they are corporate- or bank-issued, hence government bonds (which are used more for treasury and liquidity management purposes) and trading book exposure are not included. Ratios are defined in 'Annex 3'.

| Credit risk: loan portfolio overview (KBC Bank and KBL EPB) | 31-12-2005 | 31-12-2006 |
|---|------------|------------|
| Total loan portfolio (in billions of EUR) | | |

| Cover ratio | | |
| Specific loan impairment for NP loans / outstanding NP loans | 72% | 69% |
| Specific & portfolio-based loan impairment for performing and NP loans / outstanding NP loans | 99% | 100% |

Definition of ratios: see annex 3. Figures for 31-12-2006 exclude Banco Urquijo.

¹ Broken down as follows for 31-12-2006: 0.36% for CSOB, 1.50% for K&H Bank and -0.21% for Kredyt Bank.

Asset/Liability management data

The first table shows - for the banking business - the extent to which the value of the portfolio would change (basis-point-value or BPV) if interest rates were to fall by ten basis points across the entire curve (positive figures indicate an increase in the value of the portfolio). The figures relate to KBC Bank, CBC Banque, Centea, KBC Lease, KBC Deutschland, IIB Bank, KBC Bank Nederland, Antwerpse Diamantbank, ČSOB, K&H Bank, Kredyt Bank and KBL EPB.

The second table provides - for the insurance business - an overview of the composition of the investment portfolio. In the consolidated financial statements of KBC Group, the insurer's investment portfolio is not shown as such, but is spread over various balance sheet items (mainly securities and to a lesser extent investment property, loans and advances to customers, etc.).

Note 48: General information

Note available in the annual report only.

Note 49: Post-balance-sheet events

Events after balance sheet date are those events, favourable and unfavourable, that occur between the balance sheet date and the date when the financial statements are authorised for issue by the Board of Directors. They include both adjusting events after balance sheet date (events that provide evidence of conditions that existed at the balance sheet date) and non-adjusting events after balance sheet date (events that are indicative of conditions that arose after the balance sheet date). Adjusting events in principle lead to an adjustment of the financial statements for the financial period preceding the event, whereas non-adjusting events in principle only influence the financial statements for the following period(s).

Significant (non-adjusting) events between the balance sheet date (31 December 2006) and the publication of this report (22 February 2007):

- The finalisation of the acquisition of a 100%-participation in Romstal Leasing in Romania and of a 100%-participation in the equity broker Swiss Capital in Romania are expected soon. Additionally, early 2007, an agreement was reached as regards the acquisition of a majority share (between 70% and 100%, depending on the number of shareholders that decides to sell its shares to KBC) in A Banca in Serbia and 100% in the online retail broker Equitas in Hungary. These agreements still have to be approved by the relevant authorities. The total amount of the four acquisitions mentioned above is relatively limited.
- Agreement, in January 2007, to take a 70%-participation in the Bulgarian insurance company DZI Insurance (the market leader in both life and non-life insurance in that country). The agreement still has to be approved by the relevant authorities. KBC will consequently also launch a public bid for the remaining shares. KBC will pay 185 million euros for the 70%-stake (and additionally, approximately 75 million euros, i.e. an amount equal to 70% of the capital gain realized by DZI Insurance on the sale of their stake in DZI Bank and which is a cash item in DZI Insurance's balance sheet).
- Agreement on the sale, in January 2007, by K&H Bank of its participation in the Hungarian bank card clearing house Giro Bankkartya (GBC). By this deal, K&H Bank will realise a capital gain.
- Sale, in early January 2007, of KBC's non-strategic participation in Intesa San Paolo. KBC has realised a capital gain of roughly 200 million euros on this sale.
- Closing of the sale of the Italian private bank Banca KBL Fumagalli Soldan (a subsidiary of KBL EPB) is expected in 1Q 2007. This sale will generate a capital gain of circa 14 million euros, on a total price of 44 million euros.
- Mid January 2007, the storm Kyrill caused damage across Europe, which has boosted insurance claims. KBC estimates that the impact of this event on its consolidated net profit will be around 25 million euros. The impact on the combined ratio of 1Q 2007 is estimated at 5%pts.

Annexes

● Annex 1: restatement of 2005 figures

Originally, KBC opted to limit the volatility caused by the asymmetric valuation, under IAS 32/39, of the loan portfolio (at amortised cost) and of the ALM derivatives used to hedge the interest rate risk of the loan portfolio (at fair value), by using the so-called 'fair value option' instead of hedge accounting. In practice, a part of the bond portfolio was classified as 'financial instruments at fair value through profit and loss' (FIFV), so that the fair value changes of the hedging derivatives were (largely) offset by the opposite fair value changes of the FIFV portfolio. Under this approach, the interest component of the hedging derivatives was booked under 'net gains from financial instruments at fair value'.

In 4Q 2005, KBC decided to apply 'fair value hedge accounting for a portfolio hedge of interest rate risk' on the basis of the carved-out version of IAS 39 as approved by the EU (in short 'portfolio hedging') for a substantial part of the activities of KBC Bank in Belgium. As a consequence, 'hedging' via the FIFV book was, to a considerable extent, replaced by the use of portfolio hedging, which implies the fair valuing of both the ALM derivatives and the underlying loan portfolio. This change resulted in a negative 40-million-euro pre-tax impact for the full year 2005, but the effect was fully taken in 4Q 2005. The interest component of the portfolio hedge derivatives remained provisionally in the 'net gains from financial instruments at fair value' item.

In 1Q 2006, finally, KBC restated its 2005 figures, providing the correct distribution of the above-mentioned effect over the four quarters of 2005 (instead of in one quarter) and shifting the interest on portfolio hedge derivatives from the 'net gains from financial instruments at fair value' to the 'net interest income' item. *Note that the full year 2005 net result was not affected.*

The table below provides an overview of the original (i.e. as published in the 2005 annual and quarterly reports) and restated figures per quarter. Restated figures are underlined.

Annex 2: detailed information regarding Central Eastern Europe and Merchant Banking

Annex 2.1: breakdown of the Central Eastern European business unit by country

The 'Central Eastern Europe' business unit is divided up into the various Central Eastern European countries. Below, separate income statements for the Czech & Slovak Republics, Hungary and Poland are provided. These include the company figures of the above-mentioned companies, on a 100%-ownership basis. Allocated funding costs on goodwill, allocated head office expenses, consolidation adjustments, minority interests at the level of KBC and the results for Slovenia are summarised in the table 'Central Eastern Europe - other'.

Annex 2.2: breakdown of the Merchant Banking business unit into 'Commercial Banking' and 'Investment Banking'

The 'Merchant Banking' business unit consists of both Commercial Banking (mainly services to SMEs and corporate customers) as well as Investment Banking (inter alia dealing activities, securities brokerage, corporate finance,...). Below, the income statement of the Merchant Banking business unit is broken down into these two businesses.

| Income statement, Commercial Banking (in millions of EUR) | | | | | | | | | | |
|---|------------|------------|------------|------------|------------|------------|------------|------------|-----------------|-----------------|
| IFRS-FIGURES | 1Q 2005* | 2Q 2005* | 3Q 2005* | 4Q 2005* | 1Q 2006* | 2Q 2006* | 3Q 2006 | 4Q 2006 | cumul. FY 2005* | cumul. FY 2006* |
| Net interest income | 251 | 254 | 234 | 230 | 231 | 258 | 277 | 264 | 968 | 1 030 |

In order to provide more insight in the results, we provide, in the table below, a number of (non-IFRS) 'underlying figures'. An explanation of the difference between the IFRS-figures and the underlying figures is provided in the chapter 'Group Results'.

● Annex 3: Glossary of ratios used

| | |
|---|--|
| CAD ratio (banking) | [consolidated regulatory capital of KBC Bank and KBL EPB] / [total risk-weighted volume of KBC Bank and KBL EPB]. Detailed calculations in the 'Consolidated financial statements' section, note 43. This information is also available for KBC Bank and KBL EPB separately. |
| Combined ratio (non-life insurance) | [net claims incurred / net earned premiums] + [net expenses / net written premiums]. |
| Cost/income ratio (banking) | [operating expenses of the banking businesses of the group (i.e. KBC Bank and KBL EPB)] / [gross income of the banking businesses of the group]. |
| Cover ratio | [individual impairment on non-performing loans] / [outstanding non-performing loans]. For a definition of 'non-performing', see 'Non-performing ratio'. The cover ratio may also include the individual impairment on still performing loans and portfolio-based impairments. |
| Earnings per share, basic | [net profit, group share] / [average number of ordinary shares, plus mandatorily convertible bonds, less treasury shares]. |
| Earnings per share, diluted | [net profit, group share, adjusted for interest expense (after tax) for non-mandatorily convertible bonds] / [average number of ordinary shares, plus mandatorily convertible bonds, less treasury shares, plus the potentially dilutive effect of share options and ordinary convertible bonds]. |
| Equity market capitalisation | [closing price of KBC share] x [number of ordinary shares]. |
| Gearing ratio | [sum of the consolidated equity of KBC Bank, KBC Insurance, KBL EPB, KBC Exploitation and the participations of the former Gevaert group] / [consolidated equity of KBC group] |
| Loan loss ratio | [net changes in individual and portfolio-based impairment for credit risks] / [average outstanding loan portfolio]. |
| Non-performing ratio | [amount outstanding of non-performing loans (loans for which principal repayments or interest payments are more than ninety days in arrears)] / [total outstanding loan portfolio]. |
| Parent shareholders' equity per share | [parent shareholders' equity] / [number of ordinary shares and mandatorily convertible bonds, less treasury shares (at period-end)]. |
| Return on allocated capital (ROAC - for a particular business unit) | [net profit, including minority interests, of a business unit, corrected for income on allocated instead of real equity] / [average allocated equity to business unit] <ul style="list-style-type: none"> • net profit of a business unit is the sum of the profit of the companies belonging to the business unit, corrected for the funding cost of goodwill (related to the companies in the business unit) and allocated central governance expenses. • The allocated equity to a business unit is based on a tier-1 ratio of 8% of risk-weighted assets for banking activities and a solvency ratio of 200% for the insurance activities. In the banking business, allocated tier-1 capital consists of core equity (85%) and preference shares (15%), while in the insurance business, allocated capital consists purely of core equity. To calculate ROAC, only core equity is taken into account in the denominator. |
| Return on equity | [net profit, group share] / [average parent shareholders' equity, excluding the revaluation reserve for available-for-sale investments]. |
| Solvency ratio (insurance) | [consolidated solvency capital available to KBC Insurance] / [minimum required solvency margin]. Detailed calculations in the 'Consolidated financial statements' section, note 44. |
| Tier-1 ratio (banking) | [consolidated tier-1 capital of KBC Bank and KBL EPB] / [total risk-weighted volume of KBC Bank and KBL EPB]. Detailed calculations in the 'Consolidated financial statements' section, note 43. This information is also available for KBC Bank and KBL EPB separately. |
